be amended as follows:

On page 1, line 1, after the words "A BILL", delete the remainder of the bill and insert in lieu thereof the following:

"for an Act to provide the state engineer with the authority to assist communities in administering floodplain management activities under the national flood insurance program [42 U.S.C. 4001 et seq.]; to provide for enforcement; and to provide an appropriation.

BE IT ENACTED BY THE LEGISLATIVE ASSEMBLY OF THE STATE OF NORTH DAKOTA:

SECTION 1. TITLE. This Act may be cited and shall be known as the North Dakota Floodplain Management Act of 1981.

SECTION 2. LEGISLATIVE INTENT AND PURPOSE. The legislative assembly finds and declares that a large portion of the state's land resources is subject to recurrent flooding by overflow of streams and other watercourses causing loss of life and property, disruption of commerce and governmental services, unsanitary conditions, and interruption of transportation and communications, all of which are detrimental to the health, safety, welfare, and property of the occupants of

flooded lands and the people of this state. The legislative assembly further finds that public interest necessitates that the flood plains of this state be developed in a manner which will alleviate loss of life and threat to health, and reduce private and public economic loss caused by flooding.

It is therefore the policy of this state and the purpose of this Act to guide development of the floodplains of this state in accordance with the enumerated legislative findings, to reduce flood damages through sound floodplain management, stressing nonstructural measures such as floodplain zoning and floodproofing, acquisition and relocation, and flood warning practices; and to ensure as far as practicable that the channels and those portions of the floodplains of watercourses which are the floodways are not inhabited and are kept free and clear of interference or obstructions which may cause any undue restriction of the capacity of the floodways.

It is also the policy of this state and purpose of this Act to provide state coordination and assistance to communities in floodplain management activities, to encourage communities to adopt, administer, and enforce sound floodplain management ordinances, and to provide the state engineer with authority necessary to carry out and enforce a floodplain management program for the state and to coordinate federal, state, and local floodplain management activities in this state.

SECTION 3. DEFINITIONS. In this Act unless the context or subject matter otherwise provides:

1. "Commission" means state water commission.
2. "District" means a water resource district, as defined in chapter 61-16.1.
3. "Flood fringe" means that portion of a floodplain outside of the floodway.
4. "Person" means any person, firm, partnership, association, corporation, agency, or any other private or governmental organization, which includes, but is not limited to, any agency of the United States, a state agency, or any political subdivision of the state.
5. "State engineer" means the state engineer appointed

pursuant to section 61-03-01, who is also the chief executive officer of the commission, or, for the purpose of this Act, his designee.

For the purposes of this Act, the state engineer shall, in addition to the definitions listed above, follow the definitions under the national flood insurance program [42 U.S.C. 4001 et seq.] and implementing regulations, which are hereby incorporated into and made a part of this Act by reference.

SECTION 4. DUTIES OF STATE ENGINEER. The state engineer shall:

1. Collect and distribute information relating to flooding and floodplain management.
2. Coordinate local, state, and federal floodplain management activities to the greatest extent possible, and encourage appropriate federal agencies to make their flood control planning data available to communities and districts for planning purposes, in order to allow adequate local participation in the planning process and in the selection of desirable alternatives.
3. Assist communities and districts in their floodplain management activities within the limits of available appropriations and personnel in cooperation with the office of disaster emergency services.
4. Do all other things, within lawful authority, which are necessary or desirable to manage the floodplains for uses compatible with the preservation of the capacity of the floodplain to carry and discharge the base flood. In cooperation with communities and districts, the state engineer shall conduct, whenever possible, periodic inspections to determine the effectiveness of local floodplain management programs, including an evaluation of the enforcement of and compliance with local floodplain management ordinances.

SECTION 5. DELINEATION OF FLOODPLAINS AND FLOODWAYS.

The state engineer shall assist communities in preparing and

obtaining data and other necessary information for the delineation of floodplains and floodways. When the state engineer determines that sufficient technical information is available for the delineation of floodplains and floodways on a watercourse, he shall then consult with the appropriate district and each affected community. The state engineer, the affected community, and the appropriate district shall consider flooding experiences, plans to avoid potential hazards, estimates of economic impacts of flooding on the community, both historical and prospective, and such other data as the district and community may consider appropriate. Upon obtaining and developing the necessary information for delineation of the floodplain and floodway, the state engineer and the affected community shall notify the appropriate federal agency and request that such material be used to delineate the floodplain and floodway under the national flood insurance program [42 U.S.C. 4001 et seq.]. The regulatory floodway must be able to carry the waters of the base flood without cumulatively increasing the water surface elevation of the base flood more than one foot at any point.

SECTION 6. FLOODPLAIN MANAGEMENT ORDINANCES.

1. Each community shall submit the floodplain management ordinances adopted under the national flood insurance program [42 U.S.C. 4001 et seq.] to the state engineer for review.
2. If the state engineer determines that there is a failure by a community to comply with the intent, purposes, and provisions of this Act and the minimum ordinances adopted under the national flood insurance program [42 U.S.C. 4001 et seq.], the state engineer shall notify the appropriate federal agency and the community of his or her findings. The state engineer shall also notify the community of the state and federal penalties for such noncompliance and shall work with the community until such time as the state engineer determines that the community will or is complying.

SECTION 7. PERMISSIBLE FLOODWAY USES. Upon delineation

of the floodway under the national flood insurance program, uses shall be permitted within the floodway to the extent that they do not cause any increase in the elevation of the base flood.

SECTION 8. PROHIBITED USES WITHIN FLOODWAY. Upon delineation of the floodway under the national flood insurance program, the following uses shall be prohibited within any floodway:

1. A building for living purposes or place of assembly or permanent use by human beings.
2. The construction or permanent storage of an object subject to flotation or movement during flood level periods.

SECTION 9. PERMISSIBLE USES WITHIN FLOOD FRINGE. Upon delineation of the floodplain or floodway under the national flood insurance program, the following uses shall be permitted within the flood fringe to the extent that they are not prohibited by any other ordinance, regulation, or statute:

1. Any use permitted in the designated floodway pursuant to section 7.
2. Structures, including residential, commercial, and industrial structures, provided that:
  - a. Such structures meet the standards either adopted by the community or under this Act, whichever are more restrictive.
  - b. Residential structures are constructed on fill such that the lowest floor, including basements, is elevated to or above the base flood level.
  - c. Commercial and industrial structures are either constructed on fill as specified in subdivision b or are adequately floodproofed up to an elevation no lower than the base flood level. Such floodproofing shall be in accordance with the standards either adopted by the community under the national flood insurance program or under this Act, whichever

## JOURNAL OF THE HOUSE

are more restrictive.

## SECTION 10. ENFORCEMENT AND PENALTIES.

1. It is unlawful for any person to establish any use which is not in accordance with this Act within any floodplain without prior written approval of the affected community. Every use placed in the floodplain in violation of this Act or a floodplain management ordinance adopted under or in compliance with the provisions of this Act, or adopted under the national flood insurance program, is a public nuisance and the construction or installation thereof may be enjoined by an action brought by the state engineer or the appropriate community. The state engineer or community may obtain a court order directing the removal or elimination of such public nuisance; or authorizing the state engineer or community to remove the public nuisance, or cause to be removed, at the expense of the owner. A person who violates any of the provisions of this Act is guilty of a class B misdemeanor.
2. This Act shall not apply to any construction or structures existing or for which a building permit has been issued in the floodplain prior to the adoption by the community of floodplain management ordinances under the national flood insurance program.
3. Any community which fails to adopt or enforce floodplain management ordinances as required under the national flood insurance program by this Act shall not be eligible to receive any flood disaster assistance, financial or otherwise, from this state pursuant to chapter 37-17.1 or any other state funds available under any other authority for flood relief.

SECTION 11. EXCEPTIONS. This Act shall not apply to the following actions or construction, as long as the flood carrying capacity within the altered or relocated portion of any watercourse is maintained, and the cumulative effect of any

such action or construction will not increase the water surface elevation of the base flood more than one foot at any point within the community:

1. Ring dikes around individual farmsteads which are not constructed with tie backs to existing roadways or dikes.
