NOTE: The payroll additive used for budget purposes included the full cost of a family contract. At the time the budgets were prepared the anticipated rate increase for the new medical contract was estimated to be 20%. However, the actual increases under the new medical insurance contract were 36.6% for a single contract and 28.8% for a family contract.

The number of contracts for each of the five groups was adjusted from the November 30, 1978 Blue Cross and Blue Shield contract report to reflect anticipated increases due to additional new enrollments of approximately 100 contracts per quarter and for any changes due to the passing of SB #2098.
