¹ Additional federal funds are provided for grants of \$325,000 for motor carrier research to be conducted by the Transportation Institute, \$36,000 for overtime speed enforcement in the field operations program, and \$14,000 for law enforcement training at the Law Enforcement Training Academy.

A new section is added providing an appropriation of \$109,000 of federal funds for the remainder of the 1995-97 biennium to provide grants of \$89,000 to the Transportation Institute for motor carrier research and \$20,000 for overtime speed enforcement in the field operations program of the Highway Patrol.

Section 6 of the bill is changed to provide that the \$585,000 provided for purchasing mobile data terminals may not be spent prior to completion of the mobile data communications plan rather than the comprehensive public communication plan.

Section 7 of the bill providing object code line item information is removed because the object code information is being shown in this purpose of amendment.

Funding for the comprehensive public communication plan is provided as a separate line item rather than within the administration line item because it is identified as an emergency measure which will allow the funds to begin to be spent prior to July 1, 1997. As a result, section 5 is removed because it is not necessary.

The funding provided for each Highway Patrol program is as follows:
