2. **Narrative:** *Identify the aspects of the measure which cause fiscal impact and include any comments relevant to your analysis.*

Due to increased costs of metabolic food (formula) provided to individuals with phenylketonuria (PKU) and maple syrup urine disease (MSUD) and the increased program participation, it is estimated that an increase of \$80,000 will be incurred. The reengrossed bill allows the Department to seek reimbursement from any government program that provides coverage to that individual. For the 01-03 biennium it is estimated that we may collect approximately \$8,000 from other government programs. **Included in the Health Department's appropriation bill SB 2004 is \$80,000 from the community health trust fund.**

3. **State fiscal effect detail:** *For information shown under state fiscal effect in 1A, please:*

A. **Revenues:** *Explain the revenue amounts. Provide detail, when appropriate, for each revenue type and fund affected and any amounts included in the executive budget.*

The \$80,000 in the revenue column is from the community health trust fund and is included in the Health Department's appropriation bill SB 2004

B. **Expenditures:** *Explain the expenditure amounts. Provide detail, when appropriate, for each agency, line item, and fund affected and the number of FTE positions affected.*

It is estimated that the increased costs of medical foods and the increased program participation would cost an additional \$80,000 for the 2001-03 and 2003-05 bienniums. It is included in the Health Department's

appropriation bill SB 2004.

C. **Appropriations:** *Explain the appropriation amounts. Provide detail, when appropriate, of the effect on the biennial appropriation for each agency and fund affected and any amounts included in the executive budget. Indicate the relationship between the amounts shown for expenditures and appropriations.*
