PROPOSED AMENDMENTS TO HOUSE BILL NO. 1324

Page 1, line 1, after "A BILL" replace the remainder of the bill with "for an Act to create and enact a new section to chapter 49-05 of the North Dakota Century Code, relating to advance determination of prudence for a public utility's proposed new construction, lease, or improvement of an energy conversion facility, renewable energy facility, transmission facility, or proposed energy purchase contract.

BE IT ENACTED BY THE LEGISLATIVE ASSEMBLY OF NORTH DAKOTA:

SECTION 1. A new section to chapter 49-05 of the North Dakota Century Code is created and enacted as follows:

Advance determination of prudence. A public utility proposing to construct, lease, or make improvements to an energy conversion facility, renewable energy facility, transmission facility, or proposed energy purchase contract from another entity or person for the purpose of ensuring reliable electric service to its customers may file an application with the commission for an advance determination of prudence regarding the proposal. The commission may order that expenses associated with investigating the application made by the public utility for prudence of a resource addition be paid by the public utility in accordance with section 49-02-02.

1. The commission may issue an order approving the prudence of an electric resource addition if:
 - a. The public utility applies for a prudence determination before commencement of construction or purchase of an electric resource addition;
 - b. The public utility files with its application a projection of costs to the date of the anticipated commercial operation of the electric resource addition;
 - c. The commission provides notice and holds a hearing, if appropriate, in accordance with section 49-02-02; and
 - d. The commission determines that the resource addition is reasonable and prudent.
2. The commission order must be rendered no later than seven months after the public utility files its application requesting a prudence determination of an electric resource addition.
3. A resource addition approved by the commission is subject to annual reporting requirements until commercial operation of the resource addition.
4. Before commercial operation of the resource addition, the public utility shall make a general rate case filing with a full cost of service analysis including the resource addition in accordance with section 49-05-05. The commission's order determining prudence of the resource adjustment is binding for ratemaking purposes.
5. If at any time following an initial commission order, the commission, following a subsequent hearing, determines that continuation of a project is

no longer prudent or that its prior order should be modified, the public utility may recover in its rates, and in a timely manner consistent with the public utility's financial obligations, the amounts the public utility already has expensed, incurred, or obligated on a project, including interest expense and a return on equity invested in the project up to the time the new order is entered even though the project may never be fully operational or used by the public utility to serve its customers."

Renumber accordingly
