SECTION 9. AMENDMENT. Section 16.1-11-27 of the North Dakota Century Code is amended and reenacted as follows:

16.1-11-27. Arrangement of names on ballots. Sample ballots used for publication purposes must be arranged using the rotation of the ballot in the precinct in the county which cast the highest total vote for governor at the last general election at which the office of governor was filled. In the event that this determination is no longer possible due to changes in precinct boundaries, the precincts are to be ordered according to the precincts with the greatest voting age population to the least. This information is to be provided by the North Dakota state data center or based on the best available data as determined by the county auditor. On the official ballot used at the election, including electronic voting system ballots, the names of candidates beside or under headings designating each office to be voted for must be alternated in the following manner:

1. The ballot must first be arranged with all the names for each office on the ballot in an order determined by lot by the county auditor and prepared by the county auditor for all state, district, and county offices.
2. The position of names that require alternating under the provisions of this section must be alternated ~~so the name appearing first in one precinct will be last in the next precinct, and the name that appeared second must be first in the next precinct, and so on until each name has been moved up or over one space accordingly. This process must be continued from one precinct to another and for as many names as are involved~~ by an algorithm approved by the secretary of state designed to ensure to the extent possible that each name on the ballot for an office is listed in each position order on an equal number of precinct ballots spread across the county. There must be a different alternation sequence for each of the following, based on the geographical area by which the office is filled:

a. Offices to be filled by the electors of the state, the entire county, or any district which includes the entire county.

b. Offices to be filled by the electors of districts smaller than the county, with a different rotation for each of those districts.

~~3- 2. The precincts must be arranged according to the total votes cast for governor at the last general election in which the office of governor was filled, starting with the precinct having the highest total votes cast and ending with the precinct having the lowest total votes cast in that election. Although the names are to be alternated within the offices on the ballot, the name order for an office is to be the same for all ballots within a precinct.~~

SECTION 10. AMENDMENT. Section 16.1-11-31 of the North Dakota Century Code is amended and reenacted as follows:

16.1-11-31. ~~Tally books or sheets provided for election precincts—Form and contents~~ Precinct election reports. ~~Two tally books or two sets of tally sheets must be provided for each voting precinct not using electronic ballot counters. The books or sheets must contain a column for each political party or principle having candidates to be voted for at the voting precinct. Two tally books or two sets of tally sheets for candidates on the no-party ballot must be provided for each voting precinct. The books or sheets must be furnished by the county auditor at the same time and in the same manner as the pollbooks and ballots are furnished. The names of the candidates must be placed on the tally books or sheets in the order in which they appear on the official sample ballot and, as appropriate, must have the proper party or no party designation at the head thereof. Optical scan ballot tabulation machines must print reports detailing the election results from the precinct after the close of the polls.~~

Only two complete lists of voters may be kept whether or not a special election is held simultaneously with the primary election.

SECTION 12. AMENDMENT. Section 16.1-11-33 of the North Dakota Century Code is amended and reenacted as follows:

16.1-11-33. Judges of election to ~~make statement~~ run report of primary election - Contents. The judges of a primary election in each precinct shall ~~make~~ run a separate ~~statement, on blanks provided for that purpose,~~ report for each political party or principle, containing the names of all persons voted for at the primary election, the number of votes cast for each candidate, and for what office. The ~~statement~~ report must be subscribed by the election judges and must be filed with the returns in the office of the county auditor.

SECTION 13. AMENDMENT. Section 16.1-13-06 of the North Dakota Century Code is amended and reenacted as follows:

1 4. For city elections that are not held under an agreement with any county, the
2 governing body of the city shall appoint one inspector and two judges of election
3 for each precinct in the city at least ten days before the election is held and the
4 polls must be opened and closed as provided for the opening and closing of polls
5 at statewide elections. In voting precincts in which over three hundred votes are
6 cast in any previous election, two election clerks may be appointed by the
7 governing body. For a city election that is not held under an agreement with any
8 county in a precinct in which seventy-five or fewer votes were cast in the last city
9 election, the governing body of the city may appoint one inspector and one judge.

10 5. When a city enters into an agreement with the county to hold the city election in
