23-06.6-21. Cooperation between coroner or medical examiner and a procurement organization.

- A coroner or medical examiner shall cooperate with procurement organizations to maximize the opportunity to recover anatomical gifts for the purpose of transplantation, therapy, research, or education.
- 2. If a coroner or medical examiner receives notice from a procurement organization that an anatomical gift might be available or was made with respect to a decedent whose body is under the jurisdiction of the coroner or medical examiner and a post-mortem examination is going to be performed, unless the coroner or medical examiner denies recovery in accordance with section 23-06.6-22, the coroner or medical examiner or designee of the coroner or medical examiner shall conduct a post-mortem examination of the body or the part in a manner and within a period compatible with its preservation for the purposes of the gift.
- 3. A part may not be removed from the body of a decedent under the jurisdiction of a coroner or medical examiner for transplantation, therapy, research, or education unless the part is the subject of an anatomical gift. The body of a decedent under the jurisdiction of the coroner or medical examiner may not be delivered to a person for research or education unless the body is the subject of an anatomical gift. This subsection does not preclude a coroner or medical examiner from performing the medicolegal investigation upon the body or parts of a decedent under the jurisdiction of the coroner or medical examiner.

23-06.6-22. Facilitation of anatomical gift from decedent whose body is under jurisdiction of coroner or medical examiner.

 Upon request of a procurement organization, a coroner or medical examiner shall release to the procurement organization the name, contact information, and available medical and social history of a decedent whose body is under the

- jurisdiction of the coroner or medical examiner. If the decedent's body or part is medically suitable for transplantation, therapy, research, or education, the coroner or medical examiner shall release post-mortem examination results to the procurement organization. The procurement organization may make a subsequent disclosure of the post-mortem examination results or other information received from the coroner or medical examiner only if relevant to transplantation or therapy.
- 2. The coroner or medical examiner may conduct a medicolegal examination by reviewing all medical records, laboratory test results, x-rays, other diagnostic results, and other information that any person possesses about a donor or prospective donor whose body is under the jurisdiction of the coroner or medical examiner which the coroner or medical examiner determines may be relevant to the investigation.
- 3. A person that has any information requested by a coroner or medical examiner pursuant to subsection 2 shall provide that information as expeditiously as possible to allow the coroner or medical examiner to conduct the medicolegal investigation within a period compatible with the preservation of parts for the purpose of transplantation, therapy, research, or education.
- 4. If an anatomical gift has been or might be made of a part of a decedent whose body is under the jurisdiction of the coroner or medical examiner and a post-mortem examination is not required, or the coroner or medical examiner determines that a post-mortem examination is required but that the recovery of the part that is the subject of an anatomical gift will not interfere with the examination, the coroner or medical examiner and procurement organization shall cooperate in the timely removal of the part from the decedent for the purpose of transplantation, therapy, research, or education.
- 5. If an anatomical gift of a part from the decedent under the jurisdiction of the coroner or medical examiner has been or might be made, but the coroner or medical examiner initially believes that the recovery of the part could interfere with the post-mortem investigation into the decedent's cause or manner of death, the coroner or medical examiner shall consult with the procurement organization or physician or technician designated by the procurement organization about the

- proposed recovery. After consultation, the coroner or medical examiner may allow
 the recovery.
 - 6. Following the consultation under subsection 5, in the absence of mutually agreed-upon protocols to resolve conflict between the coroner or medical examiner and the procurement organization, if the coroner or medical examiner intends to deny recovery of an organ, the coroner or medical examiner or designee of the coroner or medical examiner, at the request of the procurement organization, shall attend the removal procedure for the part before making a final determination not to allow the procurement organization to recover the part. During the removal procedure, the coroner or medical examiner or designee or the coroner or medical examiner may allow recovery by the procurement organization to proceed, or, if the coroner or medical examiner or designee of the coroner or medical examiner reasonably believes that the part may be involved in determining the decedent's cause or manner of death, deny recovery by the procurement organization.
 - 7. If the coroner or medical examiner or designee or the coroner or medical examiner denies recovery under subsection 6, the coroner or medical examiner or designee of the coroner or medical examiner shall:
 - a. Explain in a record the specific reasons for not allowing recovery of the part;
 - b. Include the specific reasons in the records of the coroner or medical examiner; and
 - c. Provide a record with the specific reasons to the procurement organization.
 - 8. If the coroner or medical examiner or designee of the coroner or medical examiner allows recovery of a part under subsection 4, 5, or 6, the procurement organization, upon request, shall cause the physician or technician who removes the part to provide the coroner or medical examiner with a record describing the condition of the part, a biopsy, a photograph, and any other information and observations that would assist in the post-mortem examination.
 - 9. If a coroner or medical examiner or designee of a coroner or medical examiner is required to be present at a removal procedure under subsection 6, upon request the procurement organization requesting the recovery of the part shall reimburse

the coroner or medical examiner or designee of the coroner or medical examiner
for the additional costs incurred in complying with subsection 6.
