Sixty-first Legislative Assembly of North Dakota

SENATE BILL NO. 2141

Introduced by

Natural Resources Committee

(At the request of the Industrial Commission)

- 1 A BILL for an Act to create and enact chapter 38-11.2 of the North Dakota Century Code,
- 2 relating to damages to land surface caused by subsurface mineral extraction and related
- 3 exploration.

4 BE IT ENACTED BY THE LEGISLATIVE ASSEMBLY OF NORTH DAKOTA:

5 SECTION 1. Chapter 38-11.2 of the North Dakota Century Code is created and

6 enacted as follows:

7 <u>38-11.2-01. Definitions.</u> In this chapter, unless the context or subject matter otherwise 8 requires:

9	<u>1.</u>	"Agricultural production" means the production of any grass or crop attached to the
10		surface of the land, whether or not the grass or crop is to be sold commercially,
11		and the production of any farm animals, whether or not the animals are to be sold
12		commercially.
13	<u>2.</u>	"Drilling operations" means the drilling of a subsurface mineral extraction well and
14		the injection, production, and completion operations ensuing from the drilling which
15		require entry upon the surface estate, and includes subsurface mineral exploration
16		activities.
17	<u>3.</u>	"Mineral developer" means the person who acquires the mineral estate or lease for
18		the purpose of extracting or using the subsurface minerals for nonagricultural
19		purposes.
20	<u>4.</u>	"Mineral estate" means an estate in or ownership of all or part of the subsurface
21		minerals underlying a specified tract of land.
22	<u>5.</u>	"Subsurface mineral" means any naturally occurring element or compound
23		recovered under the provisions of chapter 38-12, but for the purpose of this chapter
24		excludes coal, oil and gas, and sand and gravel.

1 "Subsurface mineral exploration activities" means any method of obtaining 6. 2 information relative to locating and defining subsurface minerals that results in 3 surface disturbance. 4 "Surface estate" means an estate in or ownership of the surface of a particular 7. 5 tract of land. 6 8. "Surface owner" means any person who holds record title to the surface of the land 7 as an owner. 8 **38-11.2-02.** Inspection of well site. Upon request, the state department of health 9 shall conduct an investigation and take necessary measures to ensure compliance with 10 environmental impact issues relating to air, water, and land management under the jurisdiction 11 of the department as outlined in applicable articles in the North Dakota Administrative Code. 12 38-11.2-03. Notice of drilling operations. 13 The mineral developer shall give the surface owner written notice of the drilling 1. 14 operations contemplated at least twenty days prior to the commencement of the 15 operations, unless waived by agreement of both parties. 16 This notice must be given to the record surface owner at that person's address as 2. 17 shown by the records of the county recorder at the time the notice is given. 18 3. This notice must sufficiently disclose the plan of work and operations to enable the 19 surface owner to evaluate the effect of drilling operations on the surface owner's 20 use of the property. Included with this notice must be a copy of this chapter. 21 If a mineral developer fails to give notice as provided under this section, the 4. 22 surface owner may seek any appropriate relief in the court of proper jurisdiction 23 and may receive punitive as well as actual damages. 24 38-11.2-04. Damage and disruption payments - Statute of limitations. 25 The mineral developer shall pay the surface owner a sum of money equal to the 1. 26 amount of damages sustained by the surface owner and the surface owner's 27 tenant, if any, for loss of agricultural production and income, lost land value, lost 28 use of and access to the surface owner's land, and lost value of improvements 29 caused by drilling operations. The amount of damages may be determined by any 30 formula agreeable between the surface owner and the mineral developer. When

	0	,			
1		determining damages, consideration must be given to the period of time during			
2		which the loss occurs.			
3	<u>2.</u>	The mineral developer shall pay damages to the surface owner for subsurface			
4		mineral production in annual installments.			
5	<u>3.</u>	The surface owner must be compensated for harm caused by subsurface mineral			
6		exploration only by a single sum payment.			
7	<u>4.</u>	The payments contemplated by this section only cover land directly affected by			
8		drilling operations.			
9	<u>5.</u>	Payments under this section are intended to compensate the surface owner for			
10		damage and disruption. Any reservation or assignment of such compensation			
11		apart from the surface estate except to a tenant of the surface estate is prohibited.			
12		In the absence of an agreement between the surface owner and a tenant as to the			
13		division of compensation payable under this section, the tenant is entitled to			
14		recover from the surface owner that portion of the compensation attributable to the			
15		tenant's share of the damages sustained.			
16	<u>6.</u>	To receive compensation under this section, any person shall notify the mineral			
17		developer of the damages sustained by the person within two years after the injury			
18		occurs or would become apparent to a reasonable person.			
19	9 <u>38-11.2-05. Agreement - Offer of settlement.</u> Unless both parties provide otherwise				
20	by written agreement, the mineral developer shall make a written offer of settlement to the				
21	person seeking compensation for damages when the notice required by section 38-11.2-03 is				
22	presented. The person seeking compensation may accept or reject any offer so made.				
23	38-11.2-06. Rejection - Legal action - Fees and costs. If the person seeking				
24	compensation rejects the offer of the mineral developer, that person may bring an action for				
25	compensation in the court of proper jurisdiction. If the amount of compensation awarded by the				
26	court is greater than that which had been offered by the mineral developer, the court shall				
27	award the person seeking compensation reasonable attorney's fees, any costs assessed by the				
28	court, and interest on the amount of the final compensation awarded by the court from the day				
29	drilling operations are commenced. The rate of interest awarded must be the prime rate				
30	charged by	charged by the Bank of North Dakota on the date of the judgment.			

1	<u>38-1</u>	1.2-07. Protection of surface and ground water - Other responsibilities of
2	mineral dev	veloper.
3	<u>1.</u>	The mineral developer shall conduct or have conducted an inventory of water wells
4		located within one-half mile [804.67 meters] of where subsurface mineral
5		exploration activities are conducted, if such exploration activities appear
6		reasonably likely to encounter ground water, or within one mile [1.61 kilometers] of
7		a subsurface mineral production site.
8	<u>2.</u>	The mineral developer shall conduct or have conducted a certified water quality
9		and quantity test within one year preceding the commencement of subsurface
10		mineral production operations on each water well or water supply located on the
11		involved real property and as identified by the surface owner of that real property.
12	<u>3.</u>	If the domestic, livestock, or irrigation water supply of any person who owns an
13		interest in real property within one-half mile [804.67 meters] of where subsurface
14		mineral exploration activities are or have been conducted or within one mile [1.61
15		kilometers] of a subsurface mineral production site has been disrupted, or
16		diminished in quality or quantity by the drilling operations, the person who owns an
17		interest in real property is entitled to recover the cost of making such repairs,
18		alterations, or construction that will ensure the delivery to the surface owner of that
19		quality and quantity of water available to the surface owner prior to the
20		commencement of drilling operations.
21	<u>4.</u>	Any person who owns an interest in real property who obtains all or a part of that
22		person's water supply for domestic, agricultural, industrial, or other beneficial use
23		has a claim for relief against a mineral developer to recover damages for disruption
24		or diminution in quality or quantity of that person's water supply proximately caused
25		from drilling operations conducted by the mineral developer.
26	<u>5.</u>	Prima facie evidence of injury under this section may be established by a showing
27		that the mineral developer's drilling operations penetrated or disrupted an aquifer in
28		such a manner as to cause a diminution in water quality or quantity within the
29		distance limits imposed by this section.
30	<u>6.</u>	An action brought under this section when not otherwise specifically provided by
31		law must be brought within six years of the time the action has accrued. For

	-		
1		purposes of this section, the claim for relief is deemed to have accrued at the time	
2		it is discovered or might have been discovered in the exercise of reasonable	
3		diligence.	
4	<u>7.</u>	A tract of land is not bound to receive water contaminated by drilling operations on	
5		another tract of land and the owner of a tract has a claim for relief against a mineral	
6		developer to recover the damages proximately resulting from natural drainage of	
7		waters contaminated by drilling operations.	
8	<u>8.</u>	The mineral developer is also responsible for all damages to person or property	
9		resulting from the lack of ordinary care by the mineral developer or resulting from a	
10		nuisance caused by drilling operations.	
11	<u>9.</u>	This section does not create a cause of action if an appropriator of water can	
12		reasonably acquire the water under the changed conditions and if the changed	
13		conditions are a result of the legal appropriation of water by the mineral developer.	
14	14 <u>38-11.2-08. Application of chapter.</u> The remedies provided by this chapter do not		
15	preclude ar	ny person from seeking other remedies allowed by law. This chapter does not apply	
16	to the operation, maintenance, or use of a motor vehicle upon the highways of this state as		
17	these terms are defined in section 39-01-01.
