

## CONFERENCE COMMITTEE MOTION OPTIONS

This memorandum provides information regarding conference committee motions for agency appropriation bills to address the decision to provide for state employee salary equity funding in a pool rather than individual budgets.

- For House bills, since the Senate included salary equity funding, the Senate will need to recede from its amendments and amend the bill to include any agreed-upon changes except for the restoration of the state employee salary equity funding.
- For Senate bills, if the Senate agrees with all the changes made by the House, the Senate may accede to the House amendments. If the Senate does not agree with all the changes made by the House or if the Senate would like to make additional changes to the bill, the House will need to recede from its amendments and amend the bill to include any agreed-upon changes, including the removal of state employee salary equity funding.
