SECTION 2. AMENDMENT. Section 61-32-03.1 of the North Dakota Century Code is amended and reenacted as follows:

61-32-03.1. Permit to drain subsurface waters required - Permit form - Penalty.

1.
 - a. Installation of an artificial subsurface drainage subsurface water management system comprising eighty acres [32.37 hectares] of land area or more requires a permit. The watershed area drained by a subsurface water management system may not be used to determine whether the system requires a permit under this section.
 - b. Subsurface water management systems that use surface intakes must be permitted exclusively under this section if the system will have a drainage coefficient of three-eighths of an inch [0.95 centimeters] or less. Subsurface water management systems that use surface intakes must be permitted exclusively under section 61-32-03 if the system will have a drainage coefficient exceeding three-eighths of an inch [0.95 centimeters].
 - c. Installation of a subsurface water management system comprising less than eighty acres [32.37 hectares] of land area does not require a permit.
2.
 - a. The state engineer shall develop an application form for a permit for subsurface drainage of water required under this section. A person seeking to construct an artificial subsurface drainage system a subsurface water management system that requires a permit under this section must submit a completed application to the water resource district board within which is found a majority of the land area for consideration and approval. Water resource districts may attach any necessary conditions to an approved permit, but may not deny an application unless the water resource district determines the application is of statewide significance or the proposed drainage will flood or adversely affect lands of downstream landowners within one mile [1.61 kilometers] of the proposed subsurface drainage. The water resource district board may charge permit applicants a fee up to one hundred fifty dollars. Water resource districts must shall forward copies of all approved permits to the state engineer. Water resource districts shall determine if the application proposes drainage of statewide significance. If so, the application must be referred to the state engineer for consideration and approval, and the state engineer shall make a determination within thirty days. The permit applicant shall provide a thirty-day notice to downstream property owners within one mile [1.61 kilometers] of the proposed subsurface drainage. If an investigation by a water resource district or a downstream landowner within one mile [1.61 kilometers] shows that the proposed drainage will flood or adversely affect lands of downstream landowners within one mile [1.61 kilometers], the water resource district may require flowage easements before issuing a permit. If an artificial subsurface drainage system drains into an assessment drain, natural watercourse, or pond, slough, or lake, a flowage easement is not required. Flowage easements must be filed for record in the office of the recorder of the county or counties in which the lands are situated. A person that installs an artificial

~~subsurface drainage system without first securing a permit to do so, as provided in this section, is liable for all damage sustained by a person caused by the draining, and is guilty of an infraction.~~

- b. Upon submission of a completed application for a permit, the water resource district board immediately shall give notice and a copy of the submission via certified mail to each owner of land within one mile [1.61 kilometers] downstream of the proposed subsurface water management system outlet unless the distance to the nearest assessment drain, natural watercourse, slough, or lake is less than one mile [1.61 kilometers], in which case notice and a copy of the submission must be given immediately to each owner of land between the outlet and the nearest assessment drain, natural watercourse, slough, or lake. The notice requirement in this section must be waived if the applicant presents signed, notarized letters of approval from all downstream landowners entitled to notice in this subsection.
3. a. If the water resource board receives notarized letters of approval from all downstream landowners entitled to notice, the board shall approve the completed permit application as soon as practicable but no later than thirty days after receipt of the last letter. Otherwise, the water resource board shall review the completed application at its next meeting that is at least thirty days after receipt of the application. The board shall consider any written, technical evidence provided by the applicant or a landowner notified under subsection 2 addressing whether the land of a notified landowner will be flooded or unreasonably harmed by the proposed subsurface water management system. For purposes of this section "technical evidence" means written information regarding the proposed subsurface water management system, prepared after consideration of the design and physical aspects of the proposed system, and any adverse hydraulic effects, including erosion, flood duration, crop loss, and downstream water control device operation impacts, which may occur to land owned by a landowner provided under subsection 2. Technical evidence must be submitted to the permit applicant, notified landowners, and the board within thirty days of the receipt of the completed permit application by the board. A notified landowner may not object to the proposed system unless the landowner presents technical evidence under this subsection.

The board may not require a letter of approval for any land downstream of a system that outlets into an assessment drain, natural watercourse, or pond, slough, or lake if notified landowners did not provide technical evidence to the district.

c. A water resource district may attach reasonable conditions to an approved permit for a subsurface water management system that outlets directly into a legal assessment drain or public highway right of way. For purposes of this subsection, "reasonable conditions" means conditions that address the outlet location, proper erosion control, reseeding of disturbed areas, installation of riprap or other ditch stabilization, and conditions that require all work to be done in a neat and professional manner. Any condition to locate the project a minimum distance from rural water supply lines may not extend beyond an existing easement for lines, or no greater than twenty feet [6.1 meters] from either side of the water line if the rural water line was installed under a blanket easement.

- d. A water resource district may require a subsurface water management system granted a permit under this section to incorporate a control structure at the outlet into the design of the system and may require the control structure be closed during critical flood periods.
 - e. A water resource district board may not deny a completed permit application under this section unless the board determines, based on technical evidence submitted by a landowner notified under subsection 2, the proposed water management system will flood or unreasonably harm land of a notified landowner, and a notarized letter of approval required by the board has not been obtained by the applicant. For purposes of this section, "unreasonable harm" is limited to hydraulic impacts, including erosion or other adverse impacts that degrade the physical integrity of a roadway or real property within one mile [1.61 kilometers] downstream of the system's outlet.
