SENATE AMENDMENTS TO ENGROSSED HOUSE BILL NO. 1365

Page 1, line 1, after "A BILL" replace the remainder of the bill with "for an Act to create and enact a new section to chapter 25-03.1, a new subsection to section 30.1-28-04, and a new subsection to section 30.1-28-12 of the North Dakota Century Code, relating to powers, duties, and authority of a guardian regarding medical decisions; and to declare an emergency.

BE IT ENACTED BY THE LEGISLATIVE ASSEMBLY OF NORTH DAKOTA:

SECTION 1. A new section to chapter 25-03.1 of the North Dakota Century Code is created and enacted as follows:

Guardian Consent to involuntary treatment with prescribed medication.

Notwithstanding sections 25-03.1-16, 25-03.1-18.1, and 25-03.1-24, if a patient refuses treatment with prescribed medication, a treating physician, physician assistant, psychiatrist, or advanced practice registered nurse may treat the patient with prescribed medication upon consent of the patient's guardian pursuant to section 3 of this Act.

1. The guardian's consent for involuntary treatment with prescribed medication may not be in effect for more than ninety days without receiving another recommendation and determination pursuant to section 3 of this Act.
2. The patient has the right to be free of the effects of medication at the preliminary or treatment hearing by discontinuance of medication no later than twenty-four hours before the hearing unless, in the opinion of the prescriber, the need for the medication still exists or discontinuation would hamper the patient's preparation for and participation in the proceedings.

SECTION 2. A new subsection to section 30.1-28-04 of the North Dakota Century Code is created and enacted as follows:

A grant of general authority to make medical decisions includes the authority to consent to involuntary treatment with prescribed medications. Except upon specific findings of the court, a grant of limited authority does not include authority to consent to involuntary treatment with prescribed medications.

SECTION 3. A new subsection to section 30.1-28-12 of the North Dakota Century Code is created and enacted as follows:

A guardian with authority to consent to involuntary treatment with prescribed medications may not provide consent without receiving a recommendation and determination from the ward's treating physician, physician assistant, psychiatrist, or advanced practice registered nurse that:

- a. The proposed prescribed medication is clinically appropriate and necessary to effectively treat the ward and that the ward requires treatment;
- b. The ward was offered that treatment and refused it or that the ward lacks the capacity to make or communicate a responsible decisions about that treatment;
- c. Prescribed medication is the least restrictive form of intervention necessary to meet the treatment needs of the ward; and
- d. The benefits of the treatment outweigh the known risks to the ward.

SECTION 4. EMERGENCY. This Act is declared to be an emergency measure."

Page 1, line 1, after "A BILL" replace the remainder of the bill with "for an Act to create and enact chapter 61-33.1 of the North Dakota Century Code, relating to the ownership of mineral rights of land inundated by Pick-Sloan Missouri basin project dams; to provide an appropriation; to provide for retroactive application; and to declare an emergency.

BE IT ENACTED BY THE LEGISLATIVE ASSEMBLY OF NORTH DAKOTA:

SECTION 1. Chapter 61-33.1 of the North Dakota Century Code is created and enacted as follows:

61-33.1-01. Definitions.

For purposes of this chapter, unless the context otherwise requires:

1. "Corps survey" means the last known survey conducted by the army corps of engineers in connection with the corps' determination of the amount of land acquired by the corps for the impoundment of Lake Sakakawea and Lake Oahe, as supplemented by the supplemental plats created by the branch of cadastral survey of the United States bureau of land management.
2. "Historical Missouri riverbed channel" means the Missouri riverbed channel as it existed upon the closure of the Pick-Sloan Missouri basin project dams, and extends from the Garrison Dam to the southern border of sections thirty-three and thirty-four, township one hundred fifty-three north, range one hundred two west, which is the approximate location of river mile marker one thousand five hundred sixty-five, and from the South Dakota border to river mile marker one thousand three hundred three.
3. "Segment" means the individual segment maps contained within the corps survey final project maps for the Pick-Sloan project dams.
4. "State phase two survey" means the "Ordinary High Water Mark Survey Task Order #2 Final Technical Report" commissioned by the board of university and school lands.

61-33.1-02. Mineral ownership of land inundated by Pick-Sloan Missouri basin project dams.

The state sovereign land mineral ownership of the riverbed segments inundated by Pick-Sloan Missouri basin project dams extends only to the historical

Missouri riverbed channel up to the ordinary high-water mark. The state holds no claim or title to any minerals above the ordinary high-water mark of the historical Missouri riverbed channel inundated by Pick-Sloan Missouri basin project dams, except for original grant lands acquired by the state under federal law and any minerals acquired by the state through purchase, foreclosure, or other written conveyance. Mineral ownership of the riverbed segments inundated by Pick-Sloan Missouri basin project dams which are located within the exterior boundaries of the Fort Berthold reservation and Standing Rock Indian reservation is controlled by other law and is excepted from this section.

61-33.1-03. Determination of the ordinary high-water mark of the historical Missouri riverbed channel.

1. The corps survey must be considered the presumptive determination of the ordinary high-water mark of the historical Missouri riverbed channel, subject only to the review process under this section and judicial review as provided in this chapter.
2. Upon the effective date of this Act, the department of mineral resources shall commence procurement to select a qualified engineering and surveying firm to conduct a review of the corps survey under this section. The review must be limited to the corps survey segments from the northern boundary of the Fort Berthold Indian reservation to the southern border of sections thirty-three and thirty-four, township one hundred fifty-three north, range one hundred two west. Within ninety days of the first date of publication of the invitation, the department shall select and approve a firm for the review. The department may not select or approve a firm that has a conflict of interest in the outcome of the review, including any firm that has participated in a survey of the Missouri riverbed for the state or a state agency, or participated as a party or expert witness in any litigation regarding an assertion by the state of mineral ownership of the Missouri riverbed.
3. The selected and approved firm shall review the delineation of the ordinary high-water mark of the corps survey segments. The review must determine whether clear and convincing evidence establishes that a portion of the corps survey does not reasonably reflect the ordinary high-water mark of the historical Missouri riverbed channel under state law. The following parameters, historical data, materials, and applicable state laws must be considered in the review:
 - a. Aerial photography of the historical Missouri riverbed channel existing before the closure date of the Pick-Sloan project dams;
 - b. The historical records of the army corps of engineers pertaining to the corps survey;
 - c. Army corps of engineers and United States geological survey elevation and Missouri River flow data;
 - d. State case law regarding the identification of the point at which the presence of action of the water is so continuous as to destroy the value of the land for agricultural purposes, including hay lands. Land where the high and continuous presence of water has destroyed its value for agricultural purposes, including hay land, generally must be considered within the ordinary high-water mark. The value for agricultural purposes is destroyed at the level where significant, major, and substantial terrestrial vegetation ends or ceases to grow. Lands having agricultural value capable of growing crops or hay, but not merely intermittent grazing or location of cattle, generally must be considered above the ordinary high-water mark; and
 - e. Subsection 3 of section 61-33-01 and section 47-06-05, which provide all accretions are presumed to be above the ordinary high-water mark and are not sovereign lands. Accreted lands may be

determined to be within the ordinary high-water mark of the historical Missouri riverbed channel based on clear and convincing evidence. Areas of low-lying and flat lands where the ordinary high-water mark may be impracticable to determine due to inconclusive aerial photography or inconclusive vegetation analysis must be presumed to be above the ordinary high-water mark and owned by the riparian landowner.

4. The firm shall complete the review within six months of entering a contract with the department of mineral resources. The department may extend the time required to complete the review if the department deems an extension necessary.
5. Upon completion of the review, the firm shall provide its findings to the department. The findings must address each segment of the corps survey the firm reviewed and must include a recommendation to either maintain or adjust, modify, or correct the corps survey as the delineation of the ordinary high-water mark for each segment. The firm may recommend an adjustment, modification, or correction to a segment of the corps survey only if clear and convincing evidence establishes the corps survey for that segment does not reasonably reflect the ordinary high-water mark of the historical Missouri riverbed channel under state law.
6. The department shall publish notice of the review findings and a public hearing to be held on the findings. The public must have sixty days after publication of the notice to submit comments to the department. At the end of the sixty days, the department shall hold the public hearing on the review.
7. After the public hearing, the department, in consultation with the firm, shall consider all public comments, develop a final recommendation on each of the review findings, and deliver the final recommendations to the industrial commission, which may adopt or modify the recommendations. The industrial commission may modify a recommendation from the department only if it finds clear and convincing evidence from the resources in subsection 3 that the recommendation is substantially inaccurate. The industrial commission's action on each finding will determine the delineation of the ordinary high-water mark for the segment of the river addressed by the finding.

61-33.1-04. Implementation.

1. Within six months after the adoption of the final review findings by the industrial commission:
 - a. Any royalty proceeds held by operators attributable to oil and gas mineral tracts lying entirely above the ordinary high-water mark of the historical Missouri riverbed channel on both the corps survey and the state phase two survey must be released to the owners of the tracts, absent a showing of other defects affecting mineral title; and
 - b. Any royalty proceeds held by the board of university and school lands attributable to oil and gas mineral tracts lying entirely above the ordinary high-water mark of the historical Missouri riverbed channel on both the corps survey and the state phase two survey must be released to the relevant operators to distribute to the owners of the tracts, absent a showing of other defects affecting mineral title.
2. Upon adoption of the final review findings by the industrial commission:
 - a. The board of university and school lands shall begin to implement any acreage adjustments, lease bonus and royalty refunds, and payment demands as may be necessary relating to state-issued oil and gas leases. The board shall complete the adjustments, refunds,

and payment demands within two years after the date of adoption of the final review findings.

- b. Operators of oil and gas wells affected by the final review findings immediately shall begin to implement any acreage and revenue adjustments relating to state-owned and privately owned oil and gas interests. The operators shall complete the adjustments within two years after the date of adoption of the review findings. Any applicable penalties, liability, or interest for late payment of royalties or revenues from an affected oil or gas well may not begin to accrue until the end of the two-year deadline. The filing of an action under section 61-33.1-05 tolls the deadline for any oil and gas well directly affected by the action challenging the review finding.

61-33.1-05. Actions challenging review findings.

An interested party seeking to bring an action challenging the review findings or recommendations or the industrial commission actions under this chapter shall commence an action in district court within two years of the date of adoption of the final review findings by the industrial commission. The plaintiff bringing an action under this section may challenge only the final review finding for the section or sections of land in which the plaintiff asserts an interest. The state and all owners of record of fee or leasehold estates or interests affected by the finding, recommendation, or industrial commission action challenged in the action under this section must be joined as parties to the action. A plaintiff or defendant claiming a boundary of the ordinary high-water mark of the historical Missouri riverbed channel which varies from the boundary determined under this chapter bears the burden of establishing the variance by clear and convincing evidence based on evidence of the type required to be considered by the engineering and surveying firm under subsection 3 of section 61-33.1-03. Notwithstanding any other provision of law, an action brought in district court under this section is the sole remedy for challenging the final review, recommendations, and determination of the ordinary high-water mark under this chapter, and preempts any right to rehearing, reconsideration, administrative appeal, or other form of civil action provided under law.

61-33.1-06. Public domain lands.

Notwithstanding any provision of this chapter to the contrary, the ordinary high-water mark of the historical Missouri riverbed channel abutting nonpatented public domain lands owned by the United States must be determined by the branch of cadastral study of the United States bureau of land management in accordance with federal law.

61-33.1-07. State engineer regulatory jurisdiction.

This chapter does not affect the authority of the state engineer to regulate the historical Missouri riverbed channel, minerals other than oil and gas, or the waters of the state, provided the regulation does not affect ownership of oil and gas minerals in and under the riverbed or lands above the ordinary high-water mark of the historical Missouri riverbed channel inundated by Pick-Sloan Missouri basin project dams.

SECTION 2. APPROPRIATION - STRATEGIC INVESTMENT AND IMPROVEMENTS FUND. There is appropriated out of any moneys in the strategic investment and improvements fund in the state treasury, not otherwise appropriated, the sum of \$800,000, or so much of the sum as may be necessary, to the department of mineral resources for the purpose of contracting with a qualified engineering and surveying firm to conduct a limited review of the corps survey under this Act, for the biennium beginning July 1, 2017, and ending June 30, 2019.

SECTION 3. RETROACTIVE APPLICATION. Section 1 of this Act is retroactive to the date of closure of the Pick-Sloan Missouri basin project dams. The ordinary high-water mark determination under this Act is retroactive and applies to all oil and gas wells spud after January 1, 2006, for purposes of oil and gas mineral and royalty ownership.

SECTION 4. EMERGENCY. This Act is declared to be an emergency measure."

"SECTION 1. AMENDMENT. Section 49-22-03 of the North Dakota Century Code is amended and reenacted as follows:

49-22-03. Definitions.

In this chapter, unless the context or subject matter otherwise requires:

1. "Certificate" means the certificate of site compatibility or the certificate of corridor compatibility issued under this chapter.
2. "Commission" means the North Dakota public service commission.
3. "Construction" includes any clearing of land, excavation, or other action that would affect the environment of the site after April 9, 1975, but does not include activities:
 - a. Conducted wholly within the geographic location for which a utility has previously obtained a certificate or permit under this chapter, or on which a facility was constructed before April 9, 1975, if:
 - (1) The activities are for the construction of the same type of facility as the existing type of facility as identified in a subdivision of subsections 5 or 12 of this section and the activities are:
 - (a) Within the geographic boundaries of a previously issued certificate or permit;
 - (b) For an energy conversion facility constructed before April 9, 1975, within the geographic location on which the facility was built; or

- (c) For a transmission facility constructed before April 9, 1975, within a width of three hundred fifty feet [106.68 meters] on either side of the centerline;
- (2) Except as provided in subdivision b, the activities do not affect any known exclusion or avoidance area;
- (3) The activities are for the construction:
 - (a) Of a new energy conversion facility;
 - (b) Of a new gas, liquid, or electric transmission facility;
 - (c) To improve the existing energy conversion facility or gas, liquid, or electric transmission facility; or
 - (d) To increase or decrease the capacity of the existing energy conversion facility or gas, liquid, or electric transmission facility; and
- (4) Before conducting any activities, the utility certifies in writing to the commission that:
 - (a) The activities will not affect any known exclusion or avoidance area;
 - (b) The activities are for the construction:
 - [1] Of a new energy conversion facility;
 - [2] Of a new gas, liquid, or electric transmission facility;
 - [3] To improve the existing energy conversion or gas, liquid, or electric transmission facility; or
 - [4] To increase or decrease the capacity of the existing energy conversion facility or gas, liquid, or electric transmission facility; and
 - (c) The utility will comply with all applicable conditions and protections in siting laws and rules and commission orders previously issued for any part of the facility.
- b. Otherwise qualifying for exclusion under subdivision a, except that the activities are expected to affect a known avoidance area and the utility before conducting any activities:
 - (1) Certifies in writing to the commission that:
 - (a) The activities will not affect any known exclusion area;
 - (b) The activities are for the construction:
 - [1] Of a new energy conversion facility;
 - [2] Of a new gas, liquid, or electric transmission facility;
 - [3] To improve the existing energy conversion facility or gas, liquid, or electric transmission facility; or
 - [4] To increase or decrease the capacity of the existing energy conversion facility or gas, liquid, or electric transmission facility; and

- (c) The utility will comply with all applicable conditions and protections in siting laws and rules and commission orders previously issued for any part of the facility;
 - (2) Notifies the commission in writing that the activities are expected to impact an avoidance area and provides information on the specific avoidance area expected to be impacted and the reasons why impact cannot be avoided; and
 - (3) Receives the commission's written approval for the impact to the avoidance area, based on a determination that there is no reasonable alternative to the expected impact. If the commission does not approve impacting the avoidance area, the utility must obtain siting authority under this chapter for the affected portion of the site or route. If the commission fails to act on the notification required by this subdivision within thirty days of the utility's filing the notification, the impact to the avoidance area is deemed approved.
- c. Incident to preliminary engineering or environmental studies.
- 4. "Corridor" means the area of land in which a designated route may be established for a transmission facility.
 - 5. "Energy conversion facility" means any plant, addition, or combination of plant and addition, designed for or capable of:
 - a. Generation by wind energy conversion exceeding one-half megawatt of electricity;
 - b. Generation by any means other than wind energy conversion exceeding fifty megawatts of electricity;
 - c. Manufacture or refinement of one hundred million cubic feet [2831684.66 cubic meters] or more of gas per day, regardless of the end use of the gas;
 - d. Manufacture or refinement of fifty thousand barrels [7949.36 cubic meters] or more of liquid hydrocarbon products per day; or
 - e. Enrichment of uranium minerals.
 - 6. "Facility" means an energy conversion facility, transmission facility, or both.
 - 7. "Permit" means the permit for the construction of a transmission facility within a designated corridor issued under this chapter.
 - 8. "Person" includes any individual, firm, association, partnership, cooperative, corporation, limited liability company, or any department, agency, or instrumentality of a state or of the federal government, or any subdivision thereof.
 - 9. "Power emergency" means an electric transmission line and associated facilities that have been damaged or destroyed by natural or manmade causes resulting in a loss of power supply to consumers of the power.
 - 10. "Road use agreement" means permits required for extraordinary road use, road access points, approach or road crossings, public right-of-way setbacks, building rules, physical addressing, dust control measures, or road maintenance and any repair mitigation plans.
 - 11. "Route" means the location of a transmission facility within a designated corridor.

41-12. "Site" means the location of an energy conversion facility.

42-13. "Transmission facility" means any of the following:

a. An electric transmission line and associated facilities with a design in excess of one hundred fifteen kilovolts. "Transmission facility" does not include:

(1) A temporary transmission line loop that is:

- (a) Connected and adjacent to an existing transmission facility that was sited under this chapter;
- (b) Within the corridor of the sited facility and does not cross known exclusion or avoidance areas; and
- (c) In place for less than one year; or

(2) A transmission line that is less than one mile [1.61 kilometers] long.

b. A gas or liquid transmission line and associated facilities designed for or capable of transporting coal, gas, liquid hydrocarbons, liquid hydrocarbon products, or carbon dioxide. This subdivision does not apply to:

(1) An oil or gas pipeline gathering system;

(2) A pipeline with an outside diameter of four and one-half inches [11.43 centimeters] or less that will not be trenched and will be plowed in with a power mechanism having a vertical knife or horizontally directionally drilled, and its associated facilities; or

(3) A pipeline that is less than one mile [1.61 kilometers] long.

For purposes of this chapter, a gathering system includes the pipelines and associated facilities used to collect oil from the lease site to the first pipeline storage site where pressure is increased for further transport, or pipelines and associated facilities used to collect gas from the well to the gas processing facility at which end-use consumer-quality gas is produced, with or without the addition of odorant.

c. A liquid transmission line and associated facilities designed for or capable of transporting water from or to an energy conversion facility.

43-14. "Utility" means any person engaged in and controlling the generation, manufacture, refinement, or transmission of electric energy, gas, liquid hydrocarbons, or liquid hydrocarbon products, including electric power generation or transmission, coal gasification, coal liquefaction, petroleum refinement, uranium enrichment, and the transmission of coal, gas, liquid hydrocarbons, or liquid hydrocarbon products, or the transmission of water from or to any energy conversion facility."

**SECTION 4. LEGISLATIVE MANAGEMENT STUDY - COOPERATION
BETWEEN THE PUBLIC SERVICE COMMISSION AND POLITICAL**

SUBDIVISIONS. During the 2017-18 interim, the legislative management shall study cooperation and communication between the public service commission and political subdivisions in regard to ensuring local ordinances and zoning provisions are considered and addressed as part of the application and public hearing process. The study must include examination of the impacts on relationships between landowners and the oil and gas industry; impacts on the efficiency of the siting process, including timelines associated with notification and permitting; impacts on the public input process; and impacts on compliance with, and enforcement of, political subdivision zoning ordinances. The legislative management shall report its findings and recommendations, together with any legislation required to implement the recommendations, to the sixty-sixth legislative assembly."
