

What You NEED TO KNOW About COVID-19 Vaccines

COVID-19 vaccine makers cannot be sued for injuries or deaths caused by their product.[1] Victims may file a claim with the federal Countermeasures Injury Compensation Program (CICP), but as yet, there is no Table of Covered Injuries for COVID-19 vaccines. Outcomes for past claims for other products fail to inspire confidence – since 2010, a whopping 92% of claims filed with CICP were rejected, with no appeal permitted. [2][3]

The recent FDA authorization for COVID-19 vaccines is for Emergency Use Authorization ONLY. Testing for these vaccines was not required to meet standards otherwise required by federal law for FDA approval. According to the FDA, “There is no U.S. Food and Drug Administration (FDA) approved vaccine to prevent COVID-19.” [4]

Rushing a questionable vaccine into public use has fatally backfired before. A similar hurried vaccine rollout led to the death of numerous Filipino children who received a dengue vaccine during a declared epidemic, before long-term risks were understood. [6] No one yet knows how the new COVID-19 vaccines will affect people with autoimmune disease, people with cancer, pregnant women and unborn babies, or what impact the vaccine may have on fertility.

mRNA is still an unproven technology, never before used in vaccines for humans.[7] Previous coronavirus mRNA vaccine trials resulted in ferrets with liver damage,[8] mice with enhanced respiratory disease,[9] and monkeys with ADE lung damage. [10]

Current COVID-19 vaccines have not proven to prevent disease transmission.[11] [12] They may reduce symptoms without preventing infection.

COVID-19 vaccine mandates violate the basic human right to informed consent.

Centers for Disease Control
and Prevention (CDC)
Atlanta GA 30333

July 29, 2020

SENT VIA EMAIL

Elizabeth Brehm
Siri & Glimstad
200 Park Avenue, 17th Floor
New York, 10166
Via email: foia@sirillp.com

Dear Ms. Brehm:

This letter is in response to your Centers for Disease Control and Prevention and Agency for Toxic Substances and Disease Registry (CDC/ATSDR) Freedom of Information Act (FOIA) request of July 13, 2020, for:

"All documents in the CDC's possession which compare the health outcomes between children that have received vaccines and children that have never received any vaccines."

A search of our records failed to reveal any documents pertaining to your request. The CDC has not conducted a study of health outcomes in vaccinated vs unvaccinated populations.

You may contact our FOIA Public Liaison at 770-488-6277 for any further assistance and to discuss any aspect of your request. Additionally, you may contact the Office of Government Information Services (OGIS) at the National Archives and Records Administration to inquire about the FOIA mediation services they offer. The contact information for OGIS is as follows: Office of Government Information Services, National Archives and Records Administration, 8601 Adelphi Road-OGIS, College Park, Maryland 20740-6001, e-mail at ogis@nara.gov; telephone at 202-741-5770; toll free at 1-877-684-6448; or facsimile at 202-741-5769.

If you are not satisfied with the response to this request, you may administratively appeal by writing to the Deputy Agency Chief FOIA Officer, Office of the Assistant Secretary for Public Affairs, U.S. Department of Health and Human Services, Hubert H. Humphrey Building, 200 Independence Avenue, Suite 729H, Washington, D.C. 20201. You may also transmit your appeal via email to FOIARequest@psc.hhs.gov. Please mark both your appeal letter and envelope "FOIA Appeal." Your appeal must be postmarked or electronically transmitted by November 2, 2020.

Sincerely,

Roger Andoh
CDC/ATSDR FOIA Officer
Office of the Chief Operating Officer
