

Senator,

This bill is a disgrace to the legal profession.

If any one has knowledge of a crime it **SHALL** be investigated!

You work with the person or persons who turned it in and if there is any evidence at all it should be investigated especially if it is a government entity that has broken the law.

States attorney's do not file charges when criminal activity is brought to them by a citizen against any government entity.

Joe public should not have to bring cases to court when the government should be enforcing the law.
