

Senator,

I support this bill 100%!

The government has NO right to tell us what to do especially when in this plandemic it has NO authority to violate our constitutional rights.

I have an underlying health condition weakening my immune system and I have hardly worn a mask and I have been everywhere imaginable in the last year mostly without a mask.

Unless the government is going to provide proper masks that may have a chance to stop a virus from being airborne the fake masks we are wearing now do little to nothing!

Read the science on the size of the virus and you will see our paper and cloth mask are little more than a feel good item to wear.

Thank you,

--
