

Mr. Chairman and Members of the Committee

My Name is Lon Klusmann

I am in support of SB 2251

No private landowner should be subject to any entity from entering private property for the purpose of conducting a land survey either on ground or by drone, without WRITTEN authorization by the LANDOWNER, not a court or another jurisdiction.

The landowner is THE OWNER it is his, and only his decision who he allows entry.

Summit Carbon Solutions SUED our family because we did not give them 'VOLUNTARY "Survey access.

That is just plain evil!
