**3 - Bill and Fiscal Impact Summary**

*Provide a brief summary of the measure, including description of the provisions having fiscal impact (limited to 300 characters).*

SB 2367 is a bill to require assessors to use modifiers to reduce the value of agricultural land.

**4 - Fiscal Impact Sections Detail**

*Identify and provide a brief description of the sections of the measure which have fiscal impact. Include any assumptions and comments relevant to the analysis.*

The fiscal impact of this bill is unable to be determined. The Tax Director would work with the governing body to develop a schedule of modifiers that would be used to decrease the tax for each parcel affected by the modifier, then it would be applied by the assessor.

The school district foundation aid formula uses a combination of state and local taxes. The formula assumes a 60-mill contribution on the taxable valuation of the school district. When the taxable valuation is reduced, the state increases its payment to ensure the school district is receiving the per pupil payment amount set in NDCC 15.1-27.

In 2023 the total agricultural taxable valuation for the state was over \$1.3 billion, this contributes an estimated \$78 million towards the school district foundation aid formula. A reduction of 10% of the taxable valuation would result in an increase to the state aid portion of the foundation aid formula of \$7.8 million annually. Other political subdivisions would have their tax levies redistributed to other property classifications.
