

Chairman Beltz and members of the House Agriculture Committee. Thank you for allowing me to submit a testimony for Bill 2174. I oppose the changes proposed in this bill. After reading testimony from people that have lived near CAFOs I fear that these big operations are detrimental to our health. Please consider people over corporations. This dairy will cause health problems along with financial. There isn't any benefit to the community and plenty of cost. Please don't accept what the big producers say without checking it.
