

Eric Volk, Executive Director

ND Rural Water Systems Association
In Support of House Bill 1020

House Appropriations Committee-E&E Div.

January 22, 2025

Chairman Nathe and members of the House Appropriations - Education and Environment Division, my name is Eric Volk. I am the executive director of the North Dakota Rural Water Systems Association (NDRWSA). Our vision is to ensure all of North Dakota has access to affordable, ample, and quality water. NDRWSA is committed to completing and maintaining North Dakota's water infrastructure for economic growth and quality of life (see attached system map). Today, I am submitting testimony in support of a Department of Water Resources (DWR) budget that allows for adequate funding to meet the critical water needs of Rural North Dakota.

In addition to the Southwest Pipeline Project, Northwest Area Water System, the Red River Valley Water Supply Project and the Western Area Water Supply Project, there are currently many other rural and regional projects in various stages of development across the state. Some examples of these projects are the completion of a new water treatment plant for the South Central Regional Water District, the further development of the East Central Regional Water District, the start of a significant user expansion for All Seasons Water Users District, numerous Tribally Sponsored projects, in addition to several others; many of them located in the energy impacted areas of our state. All of the systems are key players in the state's Agriculture Industry. The total cost of these rural and regional projects for the next biennium is \$290 million (\$172 million state grant is needed) (see attached funding map).

These projects are designed to meet similar needs. Those needs include water quality and quantity. On the water quality side, the projects will help communities comply with federal mandates required by the Safe Drinking Water Act, including arsenic levels, nitrates, disinfection by-products, and total coliform bacteria. Quality issues also include water extremely high in sodium, sulfates, iron, and manganese. On the quantity side, many families do not have a potable source of water and even in this day and age must haul water for their families and livestock.

Meeting the demands of repairing & replacing aging infrastructure and complying with rules & regulations is taking its toll on many small and rural water systems. A United States Environmental Protection Agency study revealed that the rates needed to cover future infrastructure repair and replacement for small systems would be four times as high as their larger counterparts. Another major challenge facing rural and small water systems is the ever-increasing rural-to-urban migration, which continues to decrease the population base and adds to the cost to the individual consumer. This does offer a challenge in finding affordable ways to bring quality water to rural areas. Without significant state grant funding, the consumer's cost is too much for the average family to afford.

The money spent on water projects in the past has been an investment in the future of North Dakota – an investment in economic development and quality of life for our citizens (see attached 25-27 project funding). Every rural water system built in our state is still operating. They provide safe, clean water to their customers, reduce their debt, put money in reserve, comply with state and federal regulations, and do so with a prudent rate structure, albeit higher than most municipalities charge (see attached rate schedule). Not only do rural & regional water systems serve over 167,000 rural residents, they also provide water to 268 (75%) of the state's 355 incorporated cities (see attached map of cities not served by RW).

With that said, the NDRWSA supports a Department of Water Resources budget that allows for adequate funding to meet the critical water needs of Rural North Dakota. Thank you for giving me the opportunity to provide testimony on behalf of the members of the NDRWSA. Eric Volk, ericvolk@ndrw.org.

Rural/Regional Water Systems in ND Today

- 20 Rural Water Districts (61.35)
- 4 Tribal Systems
- 2 County Water Resource Districts
- 2 State Owned Regional Systems
- 2 Non-State Owned Regional Systems
- 1 Association
- 1 Coop

Rural/Regional Water on a Statewide Basis in 2025

- Touches Every County in the State
- Provides Water Service to over 167,000 Rural Residents
- Through over 71,000 Connections
- Network of 42,000 Miles of Pipe
- Serves 75% of ND's 355 Inc. Cities
- Water Service to almost 131,000 Residents in Bulk Cities
- No Taxing Authority

2025-27 Rural Water Bucket Projects

35 Projects

18 Systems

Total Project Cost: \$289,831,325

Potential SWC Grant: \$172,372,931

Local, Other State and Federal Funding: \$117,458,394

7 Tribal Projects from 2 Systems

Potential Tribal SWC Grant: \$40,050,000 (Included in the \$172M)

Rural Water Bucket Funding History

2011-13: \$15M

2013-15: \$36M

2015-17: \$61M

2017-19: \$27M

2019-21: \$37.2M

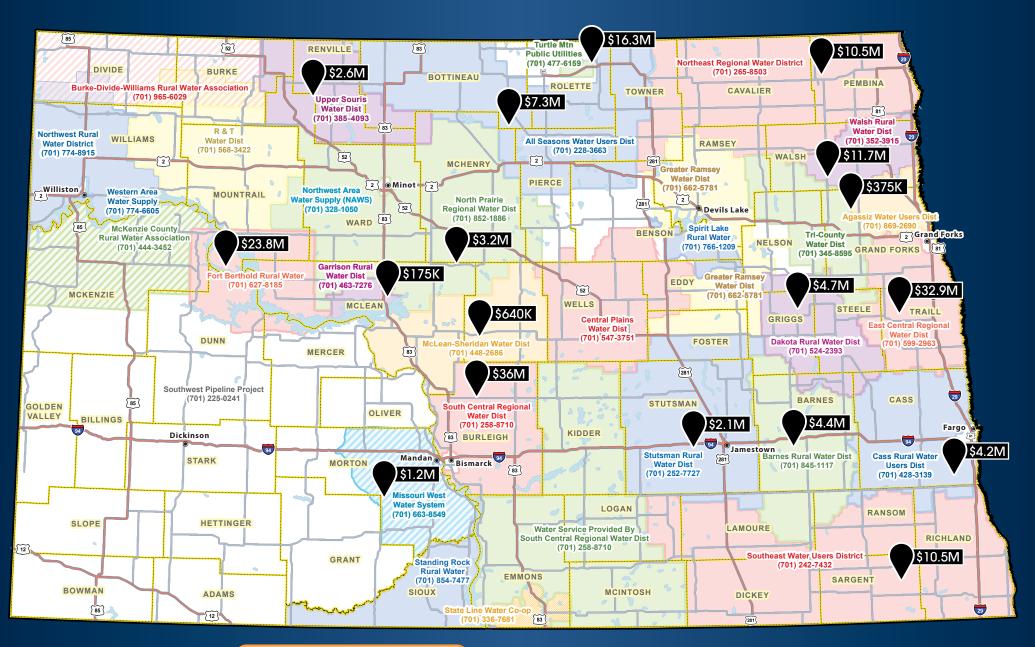

2021-23: \$59.6M

2023-25: \$52M + \$10M State Fiscal Recovery Fund

Total: \$297.8M
