

Chairman and Members of the Committee,

As a North Dakota landowner, I am writing in support of Senate Bill 2335. This bill provides essential safeguards for surface landowners, ensuring just compensation and legal protections against the actions of mineral developers.

It legally protects the surface landowner from legal fees brought on by mineral developers. As landowners we need all of these safeguards in place to protect ourselves and our property from private and public entities that have contributed to these challenges.

Respectfully,

Lucas Wald
