

I oppose SCR 4010 that would urge the NCAA to revoke allowing trans woman to participate.

This proposal has zero basis in reality. Our government officials have shown time and time again they reject reality and insert their own about trans people. No one goes through hormone treatment to gain an edge in sports. If it were real, colleges and sports teams would be seeking transwomen specifically to participate so they could win more games.

If you aim to harm people, then pass this resolution. If you want to do actual good and help athletes, provide more funding for school sports from elementary to college level, and stop restricting people from participating based on made-up scaremongering.
