

2/5/25

SCR 4006 urges U.S. Congress to pass federal legislators to protect this historic herd. While a resolution cannot require federal protections, it will provide a strong showing to Congress that these wild horses are important to North Dakotans and all Americans as an integral part of this popular national park.

Please protect these horses, leaving them to live peacefully and successfully in the open. The only interaction with humans should be for humans to help them in time of need whether for medical attention, or for food/water. Our wild herds are precious and there are so few left. They are amazing to watch. This is a part of our nation's heritage, let us protect it forever.

Thank you.
