In the following space note the fiscal effect in dollars of the legislative proposal. If additional space is needed attach a supplementary sheet. Please type.

At the present time Geological Survey appropriation includes funds for regulation of the oil and gas industry as well as funds for the Geological Survey Program. That portion used for regulating the oil industry should be appropriated to the Industrial Commission since it is the Commission that has the responsibility. This would be in the area of at least 75 per cent of the present Geological Survey appropriation. Therefore, House Bill 845 does not require an additional appropriation, but it requires a sharing of a part of the Geological Survey budget. On this basis it appears that there is no additional expenditure of state funds and technically no fiscal note is required.
