The fiscal costs of the basic program outlined in this bill will be paid through Maternal and Child Health federal funds allocated to the State Department of Health. We estimate that providing testing materials and foods for some individuals will cost approximately \$14,000 during the next biennium. If federal funds are appropriated in the State Health Department's budget, they should be increased by the above amount.

We are concerned, in regard to cost, about interpretation of lines 30, 31 and 32. If these three lines mean that the State Health Department must pay for treatment, the costs of this bill to the Department will be considerably larger. If these three lines mean that the public health nurse will make arrangements with the Welfare Department to pay for cost of treatment, the above estimate is approximately correct.
