In the following space note the fiscal effect in dollars of the legislative proposal. If additional space is needed, attach a supplementary sheet. (Please type)

The bill obviously has many effects on the internal allocation of budget resources both Universities. It would take long and careful study to determine them.

The net effect on state budgets would be zero, assuming that all engineering students stayed at one of the two universities. This is because both universities get total budget allocations based on credit hours taught or numbers of students attending which are the same thing. Both schools get equal dollars per credit hour.
