H. B. 1057, thru amendments, remodels our present air pollution control law. This remodeling by itself will have no fiscal impact. It has been demonstrated during the past two years in the discussions on coal development that there are significant gaps in air pollution control information for North Dakota. The Department has requested in the Executive Budget additional positions to provide minimum staff for this program. In other words additional funding is needed in the air pollution program but it is not directly related to the amendments proposed in H.B. 1057.
