Fifty-fifth Legislative Assembly of North Dakota

HOUSE CONCURRENT RESOLUTION NO. 3015

Introduced by

24

Representatives Drovdal, Kempenich, Warner Senator Bowman

1 A concurrent resolution urging Congress to provide funds to replace the Four Bears Bridge. 2 WHEREAS, in 1944 Congress enacted the Flood Control Act of 1944 [the Pick-Sloan 3 Act], which authorized the construction of various dams on the Missouri River, including the 4 Garrison Dam project, for the benefit of citizens of many states for the provision of inexpensive 5 electricity, flood control, water supply, and recreational opportunities; and 6 WHEREAS, as a result of the Garrison Dam, Lake Sakakawea was created on the 7 Missouri River which caused areas of North Dakota and the Fort Berthold Indian Reservation 8 which were previously closely connected by land to be separated by long expanses of water; 9 and 10 WHEREAS, a vital link in North Dakota's system of highways are bridges crossing the 11 Missouri River, including the Four Bears Bridge constructed in 1952 by the United States Army 12 Corps of Engineers, located near the city of New Town on State Highway 23 connecting United 13 States Highways 83 and 85 and traveling through the Fort Berthold Indian Reservation; and 14 WHEREAS, the Four Bears Bridge is the only bridge across the Missouri River for 190 15 miles of the river with the next two closest crossings being a bridge 90 highway miles to the 16 north and Garrison Dam 100 highway miles to the south; and 17 WHEREAS, the Four Bears Bridge provides a vital link for the entire state as well as 18 many rural communities in northwest North Dakota, including access links to businesses, farms, 19 schools, and other educational facilities, health facilities, government offices, and ambulance, 20 police, and fire protection services which are integral to the health, safety, and well-being of the 21 citizens living in this area; and 22 WHEREAS, at the time of the completion of the Four Bears Bridge by the Corps of 23 Engineers, it was obsolete based on the bridge construction standards of that time, and

presently is even more hazardous because of the narrow width of its driving surface; and

WHEREAS, the North Dakota Department of Transportation is required to maintain and
repair the Four Bears Bridge and will be required to spend at least \$8,000,000 in major
renovation and repairs to keep it in a safe and usable condition for the foreseeable future if the
bridge is not replaced; and

WHEREAS, the North Dakota Department of Transportation has determined that instead of costly repair and maintenance of an already obsolete bridge, the bridge should be replaced at an estimated cost of \$42,000,000; and

WHEREAS, the State of North Dakota has examined the many funding options but simply does not have adequate funds to either provide major maintenance for the bridge or to construct a new bridge without jeopardizing the maintenance needs and safety of other bridges in North Dakota;

NOW, THEREFORE, BE IT RESOLVED BY THE HOUSE OF REPRESENTATIVES OF NORTH DAKOTA, THE SENATE CONCURRING THEREIN:

That the Fifty-fifth Legislative Assembly urges the Congress of the United States to take whatever actions and make available appropriate funds as are necessary to replace the Four Bears Bridge in recognition of the continued federal responsibility for the Garrison Dam project; and

BE IT FURTHER RESOLVED, that the Fifty-fifth Legislative Assembly also requests the assistance and advocacy of all federal agencies responsible for or having an interest in the construction, maintenance, and replacement of the Four Bears Bridge to take all action necessary to solve the urgent problem of the replacement of the Four Bears Bridge.
