The Department anticipates that this measure, which is responsive to federal legislation, will have no fiscal impact on the Insurance Commissioner's office or the Insurance Regulatory Trust Fund. Implementation of the federal law and the changes required by it can be accomplished by existing staff. This bill, however, impacts the Comprehensive Health Association of North Dakota (CHAND) which operates as the state's high risk pool. CHAND is, in part, ultimately funded by the general fund through a statutory premium tax credit allowed insurance companies for amounts they pay to CHAND for assessments made to cover the cost of operating CHAND, over and above the premium collected from CHAND policyholders.

House Bill No. 1168 could result in a slight increase in the enrollment in the CHAND program which could have a fiscal impact on the general fund. Though impossible to precisely predict, the administrator of CHAND and industry sources do not believe the impact will exceed \$100,000 annually and will in all likelihood be considerably less.
