

Introduced by

Representatives Warner, N. Johnson, Martinson

Senators Fischer, Lyson, Taylor

1 A concurrent resolution urging the President of the United States, the Secretary of the Army,
2 and the United States Army Corps of Engineers to adopt and implement an updated Missouri
3 River Master Water Control Manual that gives fair consideration to the substantial recreation
4 values present on Lake Sakakawea, Lake Oahe, and the Missouri River in North Dakota.

5 **WHEREAS**, potential for economic growth and long-term stability in western North
6 Dakota rests to an increasing degree on the recreational usability of and tourist visitations to
7 Lake Sakakawea, Lake Oahe, and the Missouri River in North Dakota; and

8 **WHEREAS**, visitations to Lake Sakakawea, Lake Oahe, and the Missouri River in North
9 Dakota are forecast to increase dramatically due to the bicentennial celebration of the
10 exploration of the Missouri River by Lewis and Clark; and

11 **WHEREAS**, after 50 years since the closing of the Garrison Dam the federal
12 government generally and the United States Army Corps of Engineers specifically have failed
13 to adequately develop the recreation potential that exists in Lake Sakakawea, Lake Oahe, and
14 the Missouri River in North Dakota; and

15 **WHEREAS**, failure of the federal government and the United States Army Corps of
16 Engineers to facilitate development of recreation potentials will result in an unsatisfactory
17 experience for the hundreds of thousands of North Dakota visitors expected during the Lewis
18 and Clark Bicentennial; and

19 **WHEREAS**, the United States Army Corps of Engineers' delays in accounting for
20 contemporary system uses and economic growth potential have severely hampered private and
21 local government recreation development along Lake Sakakawea, Lake Oahe, and the
22 Missouri River in North Dakota; and

23 **WHEREAS**, system management based on the current Missouri River Master Water
24 Control Manual during the current and recent droughts has unnecessarily caused Lake
25 Sakakawea and Lake Oahe water levels to fall to crisis levels; thus, compounding the negative

1 environment for state, tribal, and local governments and the private sector to develop the
2 economic potential of one of North Dakota's most important natural resources; and

3 **WHEREAS**, system management based on the current Missouri River Master Water
4 Control Manual effectively gives unfair, higher priority to downstream business interests at the
5 expense of upstream business, recreation, and environmental interests; and

6 **WHEREAS**, any proposed change to the current Missouri River Master Water Control
7 Manual included in the United States Army Corps of Engineers' revised draft environment
8 impact statement would be an improvement for endangered species in the Missouri River
9 System, specifically the pallid sturgeon, least tern, and piping plover; and

10 **WHEREAS**, the United States Army Corps of Engineers has delayed updating its
11 Missouri River Master Water Control Manual even though the mandatory deadline for such an
12 update has long passed;

13 **NOW, THEREFORE, BE IT RESOLVED BY THE HOUSE OF REPRESENTATIVES**
14 **OF NORTH DAKOTA, THE SENATE CONCURRING THEREIN:**

15 That the Fifty-eighth Legislative Assembly urges the President to direct the United
16 States Army Corps of Engineers to complete and release a final, updated Missouri River
17 Master Water Control Manual as its highest priority and to commit sufficient funds and other
18 resources to fully develop the recreation potentials of the Missouri River System in North
19 Dakota; and

20 **BE IT FURTHER RESOLVED**, that the Secretary of State forward copies of this
21 resolution to the Division Commander of the Northwestern Division of the United States Army
22 Corps of Engineers; the Secretary of the Army; the Secretary of the Interior; the District
23 Engineer, Omaha District, United States Army Corps of Engineers; the Governor; each member
24 of the State Water Commission; and each member of the North Dakota, South Dakota,
25 Wyoming, and Montana Congressional Delegations.
