When the commission intends to exercise or has exercised its right to plug a well or reclaim a well site, pipeline facility, production facility, saltwater handling facility, or treating plant, the commission, as compensation for its costs, may confiscate any production-related equipment and salable oil at the well site, pipeline facility, production facility, saltwater handling facility, or treating plant. The equipment subject to confiscation is limited to that owned by the well's-operator, former operator, or working interest owner. If the commission exercises its authority under this section and there is salable oil at the well site, that oil must be confiscated. The commission shall pay the mineral owners the royalty interest in the oil confiscated at the well site. In determining the mineral owners and their royalty interests, the commission may rely upon the most recent division order it is able to obtain. If one is unavailable or the commission finds the order unreliable, the commission may rely upon any other source of information the commission deems reasonable to determine and pay mineral owners. A confiscation must be by an order of the commission after notice and hearing. A confiscation order transfers title to the commission.
