## ND Information Technology Concerns

- NDIT would better serve state agencies by reaching out and opening dialogue to discuss agency IT concerns, and before they make major changes to IT systems.
  - NDIT used to send over an upper management staff member to meet with us and address concerns.
    - NOTE: Previous NDIT employee Dan Sipes did this often with our agency.
    - Sipes' approach was to come to our agency physically, listen to our concerns, and explain NDIT's approach.
    - Sipes would also follow-up and identify a path forward to meet our agency needs.
  - Example: NDIT rolled out replacement of desk phones with TEAMS voice.
    - This was a major change to the way our staff communicated with customers.
    - Nobody from NDIT approached the Agriculture Commissioner to discuss why the change was occurring and gather feedback before the decision was final.
  - <u>Service Level Agreements</u>: State agencies no longer have the true ability to be a partner with NDIT in developing and implementing our agreement with NDIT for services.
    - We used to draft an agreement that clearly outlined the services we needed from NDIT.
    - Now, we are managed by a service level agreement that we had little to no input in the creation or changes to the agreement.
      - Example: The Department of Agriculture is a NDIT desktop support agency. We no longer can discuss our expectations as an agency for how NDIT will provide these services.
