Dear Legislators,

I am writing you in regards to HB 1307 and am in support of this bill. As a practicing and licensed chiropractic physician in North Dakota, I feel it is imperative that we maintain the individual freedom to pursue our own health and not be forced into any medical procedures that carry any risk. Furthermore, we are a culture that protects personal health information and there shouldn't be a single North Dakotan that is refused service due to refusal of carrying proof of performed medical services. As we can agree that I should not be judged by the color of my skin, nobody should be judged based upon what has been pushed through it.

Kind Regards,

Chad Zimmerman DC
