

To whom it may concern,

I, Ashlee Deschamp, am in favor of passing House Bill 1323. I will spare you and not go on and on citing all the evidence, however I will stand up in strong support of prohibiting the government from mandating masks. I do NOT want my child forced to wear a mask any longer in school, it is simply not safe, and it is eliminating our constitutional rights to make our own choices. For those that choose to wear one, if they indeed believe it is affective, would be just as "protected" provided they are wearing one. We have got to give control of people's personal decisions back to the people and away from the government. Please consider my testimony and pass Bill 1323.

Thank You for your time,

Ashlee Deschamp
