VAERS is the Vaccine Adverse Event Reporting System put in place in 1990. It is a voluntary reporting system that has been estimated to account for only **1% (see the Lazarus Report)** of vaccine injuries. **OpenVAERS** is built from the HHS data available for download at **vaers.hhs.gov**.

The OpenVAERS Project allows browsing and searching of the reports without the need to compose an advanced search (more advanced searches can be done at **medalerts.org** or **vaers.hhs.gov**).

1,697,752

— **REPORTS OF VACCINE ADVERSE EVENTS IN VAERS**

— **18,078 COVID Vaccine Reported Deaths / 27,155 Total Reported Deaths**

— **88,910 Total COVID Vaccine Reported Hospitalizations/167,662 Total Reported Hospitalizations**

— **856,917 COVID Vaccine Adverse Event Reports**

— Through October 29, 2021

Get the Red Box Report! Every week OpenVAERS will be producing a PDF with the new data and emailing it to your inbox.
