

CASH AND INVESTMENTS BY COUNTY

This map provides an overview of the total cash and investments each county had as of the date of their last audit. Statewide total: \$1,127,208,088

Data current as of January 1, 2023 based on last audit received. Please note not all counties have a 2021 audit date. This is primarily due to the shortage of government auditors in North Dakota and the difficulty entities have in securing an auditor because of this shortage.
