

Delivering a world-class aviation experience that is THE PINNACLE OF QUALITY, INNOVATION AND SAFETY

Cirrus Aircraft is the recognized global leader in personal aviation and the maker of the best-selling SR Series piston aircraft and the Vision Jet®, the world's first single-engine Personal Jet™. Founded in 1984, the company has redefined aviation performance, comfort and safety with innovations like the Cirrus Airframe Parachute System® (CAPS®) – the first FAA-certified whole-airframe parachute safety system included as standard equipment on an aircraft.

Cirrus Aircraft established its global headquarters in Duluth, Minnesota in 1994 and continues to grow its operations and workforce across the United States. Today, Cirrus has operations in seven States across the United States including Benton Harbor, Michigan; Duluth, Minnesota; Grand Forks, North Dakota; Greater Dallas, Texas; Greater Phoenix, Arizona; Greater Orlando, Florida; and Knoxville, Tennessee.

In 2017, Cirrus Aircraft was named the winner of the Robert J. Collier Trophy for achievement in aeronautics. The trophy was awarded for designing, certifying, and entering-into-service the Vision Jet – the world's first single-engine general aviation personal jet aircraft with a whole airframe parachute system.

Cirrus Aircraft continues to transform personal aviation by ushering in a new generation of owners and operators. In 2021, Cirrus Aircraft built 32% of all single-engine piston aircraft in the world and accounts for over 77% of the high-performance single-engine piston market.

IN THE STATE OF NORTH DAKOTA

24
YEARS

Over **24 years** operating in North Dakota

Over **430 North Dakota employees**, one of the **top 10 employers** in Grand Forks
