Written Testimony for the House Finance and Taxation January 16, 2023 Erica Johnsrud, McKenzie County Auditor/Treasurer

# **RE: OPPOSITION for HB 1245**

Good morning, Chairman Headland, and members of the House Finance and Taxation Committee. My name is Erica Johnsrud and I proudly serve as the Auditor/Treasurer for McKenzie County. As written, I stand in opposition of HB 1245.

I understand and appreciate the efforts to provide additional information to taxpayers. However, I do not believe this bill is the right mechanism to do so. This bill seeks to dramatically change the look and feel of the property tax statement for our citizens, in addition to requiring additional reports be uploaded to the State Auditor regarding ending fund balances.

I have no issues with providing information regarding ending fund balances to the State Auditor's Office or to any person who requests it. I do caution, however, that ending fund balances only tell a story for a snapshot in time. They do not tell you about committed funds, road or bridge projects that didn't get completed on time, costs for equipment that was ordered 8 months ago and yet to show up, or other such real-life examples. Ending fund balances are similar to receiving just page 189 from a 252 page book and then expected to provide a book report on the entire work. With no context as to how the story started and what has happened in the preceding 188 pages, it is impossible to extrapolate into the future or predict how the story may end in the remaining 63 pages which may include catastrophic or emergency events.

An additional section of this proposed bill includes language regarding communicating with the public in terms of dollars rather than mills, which I supported in HB 1119, which was before you just last week and passed unanimously on the House Floor. As I also stated in my written testimony for that bill, that will not change the way McKenzie County communicates with the public, as it is already being done in terms of dollars. Counties also did not oppose SB 2121 which will add last year's special assessment amounts to the estimated tax statements mailed out by the end of August each year.

Several years ago, before my time as Auditor/Treasurer began in 2017, a task force of state and county leaders worked together on a uniform tax statement layout for all of North Dakota in an effort to make it easier for citizens to understand and find information on their statements, regardless of the county in which they owned property. Those efforts resulted in the statements we have today. I have attached a copy of one 2022 tax statement for McKenzie County here for reference (see Attachment A).

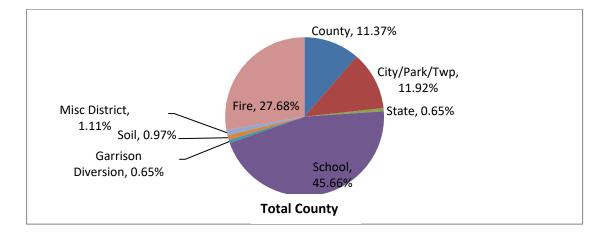

I would like to take a moment and briefly list out the changes to the tax statement, mailed every December to our taxpayers, proposed in HB 1245 which includes:

- Statement displayed in color
- Legislative tax relief information in contrasting type, font, or color that calls attention
- Separation of voter-approved tax levies from all other levies

- **Color pie chart**, specific to the parcel, showing the percentage of total tax by each taxing district, excluding amounts of voter-approved levies
- Taxing Districts listed in the same color as the representative pie chart color
- Inclusion on the pie chart of the combined voter-approved levies in separate, contrasting color
- Name and phone number of a contact person for each taxing district that levied taxes against the parcel

As you can see from the example current statement, space for the additional information is limited. But most importantly, talks with my software programmers indicate these changes are <u>not</u> possible, which is true also for many other counties around the State. Changing software programs may seem like an easy task, but I assure you it is something that cannot be taken lightly, done quickly, or done inexpensively. Several years ago we looked into finding a new software vendor – we reviewed all available programs and vendors and were unable to find anything we preferred over our current software package. Our software package combines and fits our following operational needs: tax information, budget information, accounts payable, accounts receivable, payroll, personnel, land records, fixed assets, and we are working toward implementing their new timekeeping system in the coming year. As an added bonus, when issues arrive we have an actual, live person living in the Midwest who answers the phone during our business hours and can often fix our issues within hours or days, instead of weeks. Implications to changing tax statements are not just limited to the tax portion of my work, but would impact all county systems and multiple departments that need to talk back and forth with one another without hiccups.

Since I started following and testifying during your legislative sessions a number of years ago, I have and continue to hear each of you speak of conversations with your constituents regarding complaints about property taxes. Rhetorically I ask you the following question, are they complaining about their total tax bill or about not knowing how their tax bill is distributed? I'm guessing, as I hear the same, that the complaint is about the total tax due. Unfortunately, because the County name is at the top of the statement, we get the brunt of the grievances, even though we levy just 11.4% of the total tax levied amongst taxing districts in McKenzie County, as shown in the pie chart below.

Regardless of your answer to the rhetorical question posed earlier in this testimony, I do not feel the final tax statement is the best document to address these concerns. Counties have been sending out estimated

tax statements since 2018, following a pilot study by counties prior to state-wide implementation. The estimated tax statement (see Attachment B to this testimony) has greatly improved the information provided to taxpayers BEFORE final budgets and dollars levied are complete. I like and am in favor of these estimated statements each year as they allow for the occasional error to be caught and corrected prior to final tax statements. These statements already list the date, time, and location of public hearings on budgets for each taxing district, in a parcel-specific manner. The statements also list, by percentage, the change in true and full values and state if a specific taxing district increases or decreases the amount of tax levied in dollars. In my opinion, this is the statement that will allow tax payers to have a voice in reducing budgets of their taxing district and not after the final budgets have been sent and final taxes assessed to the parcel, which drastically limits and nearly eliminates the ability to change or reduce taxes, other than through the abatement process.

I've included here with my testimony an example of additional documents given at the McKenzie County Public Budget Hearing to any taxpayer present, or anyone who later requests, which shows parcel specific examples in different classes of real estate, implications by the proposed preliminary budget and dollars levied, including dollar changes and percentage changes (see Attachment C), in addition to mills. The second page of that document lists consolidated levies by taxing district combination, as well as historical information regarding the breakdown of county-wide taxable values by class (ag, residential, commercial, centrally assessed, utilities). As shown on that document and in the table below, agricultural and residential properties account for 14.9% of the total taxable value in McKenzie County, meaning those people also pay 14.9% of the tax assessed by the County, which for the 2022 tax year is \$6.1M of a \$211M budget.

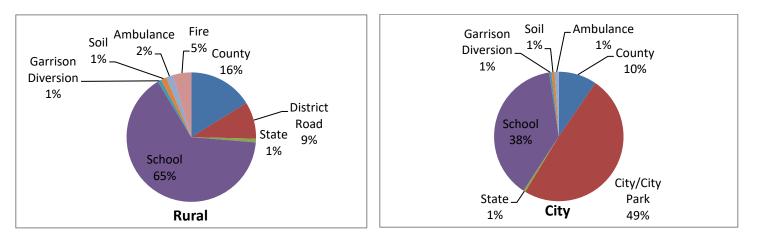

McKenzie County Taxable			
<u>Values</u>	<u>2022</u>		
Agricultural	15,231,740	4.40%	14.90%
Residential	36,346,361	10.50%	14.90%
Commercial	121,879,872	35.22%	
Railroads	68,375	0.02%	85.10%
Pipelines	171,599,428	49.58%	85.10%
Heat, Lights, Power, Gas	976,056	0.28%	
Tota	I 346,101,832	100.00%	

I do appreciate and understand the desire to work on additional transparency and clarity to the taxpayers. This is a goal of mine, as well as that of McKenzie County, and one reason why several years ago we implemented an online budget portal from OpenGov, where citizens can search budget to actual revenues, expenditures, and even search our monthly check register for specific payments made to vendors.

The changes to the final tax statement as proposed in this bill will take significant work by all counties to implement. We are open to compromises, some of which could happen more quickly than others:

• A column added to the final tax statement listing percentages by taxing district (see example in Attachment D).

• The addition of a County-wide or possibly taxing district specific black and white pie chart included on the back of the statement or a separate included page. When reviewing specific parcel pie charts for this testimony, similar trends are seen – largest portions of tax bill are cities and schools, which can also be easily determined with simple math from the dollar amounts listed on the current statement.

- A study and possible pilot during the interim to allow counties time to properly research options. This would also allow an opportunity to see if this reduces confusion and grievances and has the desired outcome.
- A review of the estimated tax statements during the interim to study changes to enhance that statement, which would provide information prior to budgets being finalized.

To close, I want to reiterate that any changes to the estimated or final tax statements will increase expenditures to counties related to the creation, printing, and mailing of these notices. We wish to work cooperatively with each of you to find a solution and are committed to doing so, but ask for time and collaboration to determine the best options, methods, and timeline for proper implementation.

Thank you all for you attention and time today. I urge a DO NOT PASS recommendation on HB 1245, as written, and stand for any questions.
