March 14, 2023

RE: Testimony to House Finance and Taxation Committee on SB 2367 – Relating to the allocation of the State share of oil and gas taxes

Chairman Headland and members of the committee,

I am Ryan Riesinger, President of the Airport Association of North Dakota (AAND) and Executive Director of the Grand Forks Regional Airport Authority (GFK). I want to thank you for the opportunity to testify today. AAND is the professional organization for North Dakota Airports and it serves to promote airports and aviation across the state. GFK consistently ranks as one of the busiest airports in the country and is the proud home of the University of North Dakota (UND) John D. Odegard School of Aerospace Sciences. I am here today on behalf of AAND and GFK to express opposition to SB 2367.

During the 2019 Legislative Session, the North Dakota legislature passed "Operation Prairie Dog" to support infrastructure development throughout the state. This 2019 appropriations bill included allocations to "Municipal/County & Township Infrastructure Funds" for the non-oil producing areas of the state, and \$20 million for a new "Airport Infrastructure Fund". These infrastructure funds were placed at the bottom of a series of "buckets" that are filled by streams from both the Oil & Gas Production Tax and the Oil Extraction tax (see attachment). SB 2367 proposes to add \$170 million to buckets placed prior to the Prairie Dog Infrastructure buckets.

At the end of the 2021 legislative session, it was forecasted that the infrastructure fund buckets would not fill during the 2021-2023 biennium. This meant that cities, counties, townships, and airports were unable to rely on this funding source as they planned and prepared for projects within the current biennium. Reliable State and local funding for transportation projects is critical in order for leaders to plan ahead, create shovel ready projects, and maximize federal grant funding. It is also important to ensure that high priority projects can move forward as efficiently as possible throughout the planning, environmental, design, bidding, and construction stages.

As our airports plan for future development and growth the funding needs are projected to be significant. Over \$1 billion in projects have been identified over the next 10 years at airports in North Dakota, and the amount for 2023-2027 alone is \$684 million (see attachment). Our airports work cooperatively with the Federal Aviation Administration (FAA) to maximize federal grant participation, but additional investment from the State and local airport sponsors will be required to meet these forecasts. Allocating \$170 million in additional funding before the Prairie Dog Infrastructure buckets will make them less reliable for the cities, counties, townships, and airports to plan for our projects and will expose us to inflation risks and potentially delay important shovel ready infrastructure projects throughout the state.

In closing, AAND and GFK are in opposition to SB 2367. We respectfully request that the committee provide a do not pass on the bill. I thank you for the opportunity to provide testimony today and will take any questions the committee may have for me.

Respectfully,

Ryan Riesinger

14mR

President, Airport Association of North Dakota

Executive Director, Grand Forks Regional Airport Authority
