

Mariah Bates
Williston, North Dakota
House Bill 1502

Members of the House Human Services Committee,

My name is Mariah Bates and I reside in District 1, I am asking that you please render a DO PASS on House Bill 1502.

The CDC's VAERS safety signal analysis for mRNA COVID-19 vaccines shows clear safety signals for death and a range of highly concerning thrombo-embolic, cardiac, neurological, hemorrhagic, hematological, immune-system and menstrual adverse events among U.S. adults.

The CDC analysis shows that the number of serious adverse events reported in less than two years for mRNA COVID-19 vaccines is 5.5 times larger than all serious reports for vaccines given to adults in the US since 2009.

There are 96 safety signals for 12-17 year-olds, which include: myocarditis, pericarditis, Bell's Palsy, genital ulcerations, high blood pressure and heartrate, menstrual irregularities, cardiac valve incompetencies, pulmonary embolism, cardiac arrhythmias, thromboses, pericardial and pleural effusion, appendicitis and perforated appendix, immune thrombocytopenia, chest pain, increased troponin levels, being in intensive care, and having anticoagulant therapy.

There are 66 safety signals for 5-11 year-olds, which include: myocarditis, pericarditis, ventricular dysfunction and cardiac valve incompetencies, pericardial and pleural effusion, chest pain, appendicitis & appendectomies, Kawasaki's disease, menstrual irregularities, vitiligo, and vaccine breakthrough infection

Please protect North Dakota Residents, North Dakota Health Care Workers, and other North Dakotans whom may be coerced by their employers, from the dangerous and unnecessary COVID-19 vaccines.

Thank you for your consideration of this important issue and for your service to the state of North Dakota.

Mariah Bates
