SB 2038

(Workforce Safety Insurance)

The first thing that needs to be done is make Workforce Safety Insurance work for the people.

I worked in this area in the past and close to 50% of my coworkers who were hurt on the job and witnessed as such had to get an attorney to get benefits that should have been readily available to them and paid for.

There is much that needs to be fixe when it comes to workforce safety and insurance and this legislature should set up public forums around the state to listen to the hard working people who get hurt on the job and how hard it is to get benefits.

Workforce Safety needs to work for the people.
