

As a mom, I can look for a safe haven for my children, and the library is a place that should be just that. My children should be able to truly experience freedom in the library while browsing books, and I as a mom would like the freedom to relax without worry of my children stumbling upon pornography. A library should be free to be a safe place, free from sexually explicit material aimed at our children. Thank you for your support of HB 1205.
