

House Energy and Natural Resource Committee:

RE: HB 1377- Opposition

Coming from a different state and witnessing the damage of the over issuance of deer tags, I can appreciate the methods of the NDG&F as it pertains to the present lottery system of deer tags.

These past few years of EHD, habitat loss and landscape strain from the recent drought years, have stressed the deer population and we seem to need a recovery period.

Thank you for your consideration.
