

Good afternoon my name is Tim Soma from Griggs county My wife Deb and I are fourth generation farmers on the family farm we are in support of SB2364 . We were planning on coming out to testify but the weather was not in favor . We would like to have the state take ownership of the red River pipeline if it should be abandoned or needs to be dug up or anything else that could come up. With eminent domain and permanent easement we are concerned that the liability will fall on the next generation or the ones proceeding. As for eminent domain we have been served papers, we were hoping that they would go away but they haven't so we are hoping just to be treated fairly
