

Weather Mod

I have lived in the southwest corner of North Dakota for 3 years and I am appalled that we even have the weather modification. It has not proved anything except it makes farmers and ranchers outside our area suffer. We are a drought area and we have decided to mess with Mother Nature. Weather modification does nothing to help our farmers and ranchers. We need to support all of our farmers and ranchers, if the weather modification continues we will be in serious danger of losing our farms and ranches. We need to come together and fight this so the next generation can continue on our families legacys. Thank you
