

January 12, 2023

As a commercial beekeeper I am in opposition of the proposed 4.1-16-08.1

Placement or location of a hive.

When a farmer or rancher agrees to have bees placed on his property, they designate where they would like the hives placed. They would much prefer that we did not drive a quarter of a mile across their planted fields of canola or sunflowers or alfalfa.

As an industry we face enough challenges, please do not add another one.

Thank you for your time

Sincerely,

Nancy Kiefat
