

What is curling but sportsmanship, creating relationships, learning to work as a team, practicing self-control, learning to share meals/snacks, having fun, and getting the whole family involved in a physical activity.

I started curling when I moved to the great state of North Dakota, to meet people and have some fun. It is not always easy to make friends in a new state as an adult and curling opened my world to all types of people, from doctors to laborers. It has turned into almost 10 years of community involvement, supporting our youth, and getting my own son involved in it.

Unlike many other popular sports, curling allows families to connect on a different level as they have to learn to communicate and trust in one another to get the job done. There are many great sports programs in North Dakota, but none speak to the North Dakota Nice as well as curling does.

Please vote yes on making curling the official sport of North Dakota.

Thank you,

Michelle McKim
