

Can of worms.

By voting yes on this bill we are potentially stripping power from a state agency whose only mission is to protect our wildlife. By passing this bill will open the door to question all Game and Fish regulations. Maybe the limit on walleye and pheasants is bogus and people should be able to harvest what they want. Maybe, hunting out of a vehicle should be revisited, why can't we just chase down our wildlife. You created a state agency to protect our Natural Resources, let them!

I understand that people are upset that baiting is illegal in areas and not legal in other areas. Maybe making baiting illegal state wide would level the playing field.
