

Senate Energy and Natural Resource Committee:

In support of HB1151

Baiting is important to me because getting close encounters with wildlife with my kids and keeping them interested in hunting, is important to me. Plus, I have a short window between work and family to hunt so it gives a better success rate by using bait to bring in deer.

Taking older members of my family, who can no longer hike, and giving them a quality hunt is important to me. Likewise, baiting allows me to take a more ethical shot at the deer while reducing my chances of wounding the animal.
