

My name is Wes Simmons From Minot ND, I am writing in support of HB1151. There is no evidence that banning baiting has any effect on cwd. If banning baiting helps at all why can people still feed for any reason other than hunting? I feel these rules intentional or not are meant hurt sportsmen and women, to be frank it seems more political than anything. Deer feed together and in the same spots without baiting as they are heard animals so banning baiting will not make a difference and again there is no evidence that it will. As a sportsman a hunter and conservationist I write this in support of HB1151.

Please pass HB1151, sincerely Wes Simmons
