

Testimony in support of HB1151

Mr Chairman and the members of the Senate Energy and Resources Committee,

I am writing to encourage you to support this bill. I have read numerous reports on this subject and do not agree with the North Dakota Game and Fish. Yesterday I observed a herd of deer feeding together closely in a stubble field. There were more deer in that one spot than there were at one of my bait stations several years back when it was legal for us to do it. Please vote yes on HB1151 and thank you for your time.
