

My name is Mike Rabenberg from Bismarck. I am submitting this testimony in opposition to HB1151. I am an avid archery and rifle deer hunter. I understand that Chronic Wasting Disease poses a significant potential threat to North Dakota's deer and moose populations. In my opinion, the legislature should not limit the tools available to NDGFD for combating this potentially devastating disease. Let the wildlife professionals do their job. Real sportsmen understand that additional hunting rules and restrictions are sometimes necessary to ensure future hunting opportunity for all North Dakotans.
